List of tables

Table S1: Children aged 0–14 years with a disability by disability group and level of restriction, 1998	xiii
Table 1.1: Children aged 0–14 years with a severe or profound core activity restriction: accommodation type, Australia, 1981–1998.....	4
Table 3.1: Key terms from the ABS Survey of Disability, Ageing and Carers, 1998	13
Table 3.2: Disability status by sex and age, Australia, 1998.....	16
Table 3.3: Children aged 0–14 years with a disability: type of disabling condition by level of restriction and sex, as a percentage of the Australian population of that sex and age, 1998	20
Table 3.4: Children with a disability: type of disabling condition by level of restriction, as a percentage of the Australian population of the same age (0–4, 5–9, 10–14 years), 1998.....	24
Table 3.5: Selected health conditions associated with physical disability, children aged 0–14 years, number and percentage of all children aged 0–14 years, 1998 ('000).....	27
Table 3.6: Estimated total prevalence of selected birth defects (including terminations of pregnancy), Victoria, Western Australia and South Australia, 2001.....	28
Table 3.7: Children aged 0–14 years receiving CSTDA-funded services, by English Proficiency Group, 1 January to 30 June 2003.....	31
Table 3.8: Children aged 0–14 years with a disability, by sex, area of residence and specific core activity restriction status, 1998 (rate per 1,000 population).....	31
Table 3.9: Children aged 0–14 years with a disability by disability status, for 1981, 1988, 1993 and 1998, age-standardised prevalence rates.....	35
Table 3.10: Children aged 5–14 years with a severe or profound core activity restriction living in households: activity type with which assistance needed, 1993–1998 ('000).....	36
Table 3.11: Children and youth aged 5–20 years with a disability, school attendance by type of school and class, by disability status, as a percentage of the Australian population of that age, 1981–1998	38
Table 3.12: Children aged 0–14 years with a disability: prevalence rates (%) of all reported disabling conditions by type of condition, Australia, 1981, 1988, 1993 and 1998.....	39
Table 3.13: Dexamphetamine prescription items requested under the Pharmaceutical Benefits Scheme (PBS), by state and territory, 1992–2003	40
Table 3.14: Recipients of disability-related carer payments and allowances, June 1994–June 2002	41
Table 3.15: Consumers of CSTDA-funded services, 0–14 years, 1999–2002.....	42
Table 4.1: Primary carers of co-resident children aged 0–14 years with a disability: relationship to recipient of care, 1998	54

Table 4.2: Children aged 0–14 years with a profound or severe core activity restriction living in households, by need for assistance with daily activities and type of assistance received, 1998.....	54
Table 4.3: Primary carers of co-resident children aged 0–14 years with a disability: hours of care provided per week by the primary carer, 1998.....	55
Table 4.4: Primary carers of co-resident children aged 0–14 years with a disability: assistance with core activity, 1998	55
Table 4.5: Primary carers of co-resident children aged 0–14 years with a disability: greatest support needs, 1998	56
Table 4.6: Labour force participation of primary carers of co-resident children aged 0–14 years with a disability and mothers of children aged 0–14 years, 1998	56
Table 4.7: Primary carers of co-resident children aged 0–14 years with a disability: principal source of income and effect of caring role on financial situation, 1998	57
Table 4.8: Primary carers of co-resident children aged 0–14 years with a disability, living in households: reported changes in emotional and physical wellbeing, 1998	58
Table 4.9: Primary carers of co-resident children aged 0–14 years and with a disability: changes to relationships with child, family and friends	59
Table 5.1: Recipients of disability-related carer payments, June 2003	65
Table 5.2: Service users of CSTDA-funded support services, service type by age group, 1 January–30 June 2003.....	67
Table 5.3: Service users aged 0–14 years of CSTDA-funded services, disability group by service type, 1 January–30 June 2003	68
Table 5.4: Aids used by children aged 0–14 years with a disability, 1998	71
Table 5.5: Students with disabilities attending government and non-government schools, 2002 (FTE).....	72
Table 5.6: Children aged 5–14 years with a specific restriction, by type of school/class attended and severity of restriction, 1998.....	73
Table 5.7: Children aged 5–14 years with a specific restriction by type of support provided and type of school/class, 1998.....	74
Table 5.8: SAAP clients aged 0–14 years identified as having a disability, as a proportion of all clients, 2002–03	76
Table 5.9: Children with disabilities: attendance at child care services, May 2002.....	77
Table A2.1: Level of core activity restriction by age group, percentage of population of same age, percentage of population of same age with disability and number, Australia, 1998 ('000)	106
Table A2.2: Level of communication restriction among children aged 0–14 years with a disability, 1998.....	106
Table A2.3: Disability status by disability group, all disabling conditions and main disabling conditions, 0–14 years and all ages, Australia, 1998	107

List of figures

Figure 2.1: Interactions between components of the International Classification of Functioning, Disability and Health – example of Down syndrome and possible related disabilities.....7

Figure 3.1: Children aged 0–14 years by disability status, Australia, 199815

Figure 3.2: Main disabling conditions and all disabling conditions, children aged 0–14 years, 1998.....22

Figure 3.3: Children aged 0–14 years with a disability: type of disabling condition by level of restriction, 1998 ('000).....25

Figure 3.4: Prevalence rate of severe and profound core activity restriction for children aged 5–14 years, various years (percentage of children aged 5–14 years).....36

List of boxes

Box 2.1: Disability groups.....9

Box 3.1: Areas of limitation, restriction or impairment identified by the ABS12

Box 3.2: Prevalence estimates for disability groups.....19

Box 5.1: Definition of ‘profoundly disabled child’ (CP).....61

Box 5.2: Child Disability Assessment Tool (CDAT)62

Box 5.3: Concession cards.....63

Box 5.4: Other allowances and assistance for carers of children with disabilities64

Box 5.5: Service types offered under the CSTDA.....66

Box 5.6: Government-funded housing assistance under the Commonwealth State Housing Agreement (CSHA)75

Box 6.1: Examples of the types of questions asked about children aged 0–14 years in the 1998 ABS Survey of Disability, Ageing and Carers.....84

Box 6.2: Australian Bureau of Statistics 2006 Population Census: proposed ‘disability, need for assistance’ questions101

Box 6.3: Children's Services NMDS Pilot Test 2004: child disability question102

Box 6.4: Western Australian examples of data linkage103

Acknowledgments

The authors of this report were Louise York and Samantha Bricknell. The report builds on previous AIHW reports on the definition and prevalence of disability in Australia, in particular the work of Ros Madden and Xingyan Wen.

Special thanks to Ros Madden, Head of Functioning and Disability Unit, who was involved in scoping this study and who provided intellectual and practical guidance and input throughout. Thanks to Diane Gibson, Head of Welfare Division, who was largely responsible for getting this project on the AIHW work program and who provided comments throughout. Thanks also to the Children, Youth and Families Unit, which was involved in the early work on the project, and Monique Nesa who reviewed the section on siblings.

We also thank the remaining members of the Functioning and Disability Unit and other units within the AIHW, who provided input on specific aspects of the report and who commented on various drafts.

The expertise and input of the report's external referees are also gratefully acknowledged (see Appendix 1 for a list of referees).
