n.a. Not applicable: disability rates were not calculated for SLAs with fewer than 500 usual residents aged 0–64 years. People living in these SLAs were included in the calculation of city total disability rates.

Notes

1. Percentages have been standardised to the age- and sex-distribution of the Australian population on Census night 2006.
2. Excludes SLAs without a score on the Index of Economic Resources.
3. For IER quintiles within cities, 1=most disadvantaged and 5=most advantaged. An SLA's quintile within its capital city will not necessarily be the same as its quintile within all capital city SLAs, or within all Australian SLAs. Hobart SLAs were not divided into quintiles.
4. For further details about the Index of Economic Resources, including interpretation notes, see ABS 2008. Information paper: An introduction to Socio-Economic Indexes for Areas (SEIFA), 2006. ABS cat. no. 2039.0. Canberra: ABS.
