(b) The number of observations contributing to this cell is fewer than ten.

Notes

1. In this table, detention *episodes* of the same type that are separated by a transfer within detention are considered to be one *episode* and their length summed.
2. The use of the *episode* hierarchy may shorten or hide *episodes* that are lower on the hierarchy.
3. Data on unsupervised bail are not collected in the NMDS and hence are not included in the pre-sentence figures.
4. Age (in years) calculated as at entry to *episode*. The *episode* may have begun before 2006–07.
5. Cells are not published (n.p.) where N<5.

Notes

1. Transferred does not include transfers from one detention centre to another within a jurisdiction in the same supervision period.
2. Some reasons for exit may be due to the result of an appeal.
3. Queensland JJ NMDS data records 'Released on bail' as a reason for exit only for pre-sentence episodes that are followed by a period of conditional (supervised) bail. For this reason, frequencies for 'Released on bail' may be an underestimate of actual exits to periods of bail.
