## Notes to Appendix A tables

- (a) Tables show funding provided by the Australian Government, state and territory governments and local government authorities and by the major non-government sources of funding for health care. They do not show gross outlays on health goods and services by the different service provider sectors.
- (b) Includes rebates claimed through taxation.
- (c) 'Other' includes expenditure on health goods and services by workers' compensation and compulsory third-party motor vehicle insurers as well as other sources of income (for example, interest earned) for service providers.
- (d) 'Other non-institutional services' is a summary of community and public health, dental services and administration.
- (e) Includes some expenditures that were previously classified as 'other non-institutional (nec)' as well as expenditure on community and public health services.
- (f) Capital formation for the non-government sector cannot be allocated according to the source of funds.
- (g) Non-government capital consumption (depreciation) is incorporated in recurrent expenditure.
- (h) Preliminary estimates for 2001-02 are based on estimated growth between 2000-01 and 2001-02 for particular types of services and sources of funds.
- (i) Constant price health expenditure for 1991-92 to 2000-01 from which growth rates were calculated is expressed in chain volume measures, referenced to the year 2000-01.
