Explanatory notes on changes to the Medical Labour force Survey

Tables

1. All employed practitioners

Table 1: Employed medical practitioners: type, states and territories, 1995–2001

Table 2: All registered medical practitioners: employment status and sex, states and territories, 2001

Table 3: Employed medical practitioners: main occupation and sex, Australia, 1995–2001

Table 4: Employed medical practitioners: main occupation and sex, states and territories, 2001

Table 5: Employed medical practitioners: main occupation, age and sex, Australia, 2001

Table 6: Employed medical practitioners: average age, main occupation and sex, states and territories, 2001

Table 7: Employed medical practitioners: main occupation, states and territories, 2001

Table 8: Employed medical practitioners: main occupation, total hours worked, Australia, 2001

Table 9: Employed medical practitioners: average hours spent in different medical occupations, by main occupation, 2001

2. Employed practitioners by region

NB: The geographic classification used to present regional data has changed. The Remoteness Area Structure of the ASGC was introduced from 2001. Prior to this, the Rural, Remote and Metropolitan Areas (RRMA) classification was used to differentiate between regions (for more information see 'Geographic classification' in the Glossary of the publication: Medical Labour Force, 2001). Selected data are presented using both geographic classifications to enable some comparisons with earlier surveys.

2a Using the Remoteness Area Structure of the ASGC

Table 10a: Employed medical practitioners: selected characteristics, geographic region of main job, 2001

Table 11a: Employed medical practitioners: occupation, geographic region of main job, 2001

Table 12a: Medical practitioners by age and geographic region of main job, Australia, 2001

Table 13a: Average age of medical practitioners by sex and geographic region of main job, Australia, 2001

Table 14a: Employed medical practitioners: occupation, total hours worked per week and geographic region of main job, Australia, 2001

Table 15a: Hours worked characteristics: occupation and geographic region of main job, Australia, 2001

Table 16a: Employed medical practitioners per 100,000 population: geographic region of main job, states and territories, 2001

2b. Using the Rural, Remote and Metropolitan Areas (RRMA) classification

Table 10b: Employed medical practitioners: selected characteristics, geographic region of main job, 2001

Table 11b: Employed medical practitioners: occupation, geographic region of main job, 2001

Table 12b: Medical practitioners by age and geographic region of main job, Australia, 2001

Table 13b: Average age of medical practitioners by geographic region of main job, Australia, 2001

Table 14: Employed medical practitioners: occupation, total hours worked per week and geographic region of main job, Australia, 2001

Table 15: Hours worked characteristics: occupation and geographic region of main job, Australia, 2001

Table 16: Employed medical practitioners per 100,000 population: geographic region of main job, states and territories, 2001

3. Primary care Practitioners

Table 17: Primary care practitioners^(a): selected characteristics, states and territories, 2001

Table 18: Primary care practitioners: selected characteristics, geographic region of main job, 2001

Table 19: Primary care practitioners: sex, qualification, main field of practice, states and territories, 2001

Table 20: Vocationally registered general practitioners^(a): selected characteristics, states and territories, 2001

Table 21: Vocationally registered general practitioners^(a): selected characteristics, geographic region of main job, 2001

Table 22: RACGP trainees^(a): selected characteristics, states and territories, 2001

Table 23: RACGP trainees^(a): selected characteristics, geographic region of main job, 2001

Table 24: Other medical practitioners^(a): selected characteristics, states and territories, 2001

Table 25: Other medical practitioners^(a): selected characteristics, geographic region of main job, 2001

Table 26: Primary care practitioners: total hours worked per week, sex and age, Australia, 2001

Table 27: Primary care practitioners: number of practitioners in practice, sex states and territories, 2001

Table 28: Primary care practitioners: practice size, sex, age and total hours worked, states and territories, 2001

Table 29: Primary care practitioners: locum/deputising service status, sex, state and territories, 2001

4. Hospital non-specialists

Table 30: Hospital non-specialists: selected characteristics, states and territories, 2001

Table 31: Hospital non-specialists: classification, age, states and territories, 2001

Table 32: Hospital non-specialists: classification, total hours worked per week, states and territories, 2001

Table 33: Hospital non-specialists: average total hours worked per week, age, classification, states and territories, 2001

Table 34: Hospital non-specialists: training status, classification, states and territories, 2001

Table 35a: Hospital non-specialists: worksetting of main job, classification, states and territories, 2001

Table 35b: Hospital non-specialists: sector of main job, classification, states and territories, 2001

Table 36: Hospital non-specialists: classification, age, geographic region of main job, 2001

Table 37: Hospital non-specialists: classification, hours worked (ranges), geographic region of main job, 2001

Table 38: Hospital non-specialists: average total hours worked per week, age, classification, geographic region of main job, 2001

Table 39: Hospital non-specialists: worksetting of main job, classification, geographic region of main job, 2001

5. Specialists and specialist-in-training

Table 40: Specialists who spend most of their time as clinicians: selected characteristics, states and territories, 2001

Table 41: Specialists who spend most of their time as clinicians: main specialty of practice, states and territories, 2001

Table 42: Specialists who spend most of their time as clinicians: main specialty of practice, age, 2001

Table 43: Specialists who spend most of their time as clinicians: main specialty of practice, total hours worked per week, 2001

Table 44: Specialists^(a) who spend most of their time as clinicians, practising in each specialty: sex Australia, 2001

Table 45: Specialist^(a) qualifications: main specialty of qualification states and territories, 2001

Table 46: All specialists, including those who are non-clinicians in their main occupation: specialty of practice, main occupation, 2001

Table 47: All Specialists including those who are non-clinicians in their main occupation: main specialty of practice, total clinical hours worked per week, 2001

Table 48: All specialists, including those who are non-clinicians in their main occupation: specialty of practice, sex, Australia, 2001

Table 49: Specialists-in-training: selected characteristics, states and territories, 2001

Table 50: Specialists-in-training: specialty of training, states and territories, 2001
