Symbols and other usages

Throughout this publication, data may not add to the totals shown due to the estimation process for non-response.

Throughout this publication, percentages may not add to 100.0 due to rounding.

Italics within a table denote a subtotal.

Percentage printed as 0.0 may denote less than 0.05%.

. . . denotes not applicable.

n.a. denotes not available.

– denotes nil.

Acknowledgments

This publication was prepared by Cathy Frazer, Graham Angus, and Glenice Taylor of the Labour Force and Rural Health Unit of the Australian Institute of Health and Welfare, with assistance from Kathy Southgate of the Data and Information Technology Unit of the Australian Institute of Health and Welfare.

We thank each state and territory pharmacy board and health authority for providing data used in this publication; the Department of Immigration and Multicultural and Indigenous Affairs for immigration data; the Department of Education, Science, and Training for education data; and the Department of Health and Ageing for Pharmaceutical Benefits Scheme statistics.

Most importantly, we also thank the pharmacists who took the time to complete the survey. Without their cooperation, it would not be possible to maintain this collection, which is used to underpin planning and policy decisions.
