

Figure 13: Percentage of Darwin residents aged 0–64 years with severe disability, by SLA of usual residence

What does the map tell us?

- ▶ 1.9% of people aged 0–64 years living in Darwin had severe disability
 - ▷ ranging from 0.5% in Bayview–Woolner, Larrakeyah and Litchfield—Pt A to 3.6% in Narrows.
- ▶ People living in the most disadvantaged quintile of Darwin were more than twice as likely (2.5%) to have severe disability as those living in the most advantaged quintile (1.2%).
- ▶ Darwin has a moderate social gradient of disability (Spearman's rank order correlation coefficient = -0.688).
