2010 Australian Infant Feeding Survey (ANIFS)	The 2010 Australian National Infant Feeding Survey (ANIFS) gathered information about infant feeding practices and attitudes from a sample of mothers and carers in Australia. The survey gathered information about the prevalence and duration of breastfeeding and collected information on other foods consumed by infants. The survey also gathered information about barriers to initiating and continuing breastfeeding and gathered information about perinatal depression.	1/03/2010	31/03/2011	National	Publications, there are restrictions and limitations governing the availability or use of other data in this holding.	Mothers or primary carers of infants aged up to 24 months. Sample selected from the Medicare enrolment database.	Survey		2010 ANIFS indicator results Researchers can access a confidentialised unit record file through the Australian Data Archive .	pophealth2@aihw.gov.au	
2010 National Drug Strategy Household Survey Master Unit Record File	This is the tenth in a series of surveys auspices by the National Drug Strategy (and its predecessors) and the fifth to be conducted by the AIHW. It is a national household survey of non-institutionalised persons aged 12 years and over. There were 26,648 completed responses in 2010. Fieldwork was conducted by Roy Morgan Research.	29/04/2010	14/09/2010	National and State	Publications, Summary tables published in electronic form, Statistics, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	The estimates for 2010 contained in this publication are based on information obtained from people aged 12 years or older or 14 years or older (as specified) from all states and territories. The scope of the survey was residential households, and excluded institutional settings, hostels, motels and homeless people. Foreign language interviews were not conducted. Adult Vaccination Survey Data Collection	The Adult Vaccination Survey gathered information about vaccination of adults for the following conditions: influenza, pneumonia, tetanus, shingles. In 2009 the survey also gathered information about vaccination for pertussis ('whooping cough') and the pandemic (H1N1) virus, also known as 'swine flu'. This survey was run seven times between 2000 and 2010. The AIHW holds the data for 2002, 2004, 2006 and 2009/10.	1/01/2002	31/12/2010	National	Publications, there are restrictions and limitations governing the availability or use of other data in this holding.	The survey scope is a nationally representative sample of adults. Age ranges vary by survey. Alcohol and Other Drug Treatment Services (National Minimum Data Set)	The Alcohol and Other Drug Treatment Services National Minimum Data Set (AODTS NMDS) emanated from the national forum 'treatment and research - where to from here?' held in 1995 by the Alcohol and Other Drugs Council of Australia. In December 1999 the Commonwealth and state and territory governments through the then National Health Information Management Group endorsed a version of the AODTS NMDS for collection to commence on 1 July 2000. The first data were collected for 2000-01; this was considered a pilot year. The data from 2001-02 onwards contain information about alcohol and other drug treatment services; the clients who use these services; the types of drug problems for which treatment is sought and the types of treatment provided.	1/07/2000	30/06/2021	National; National and State; Other	Publications, Data cubes, Summary tables published in electronic form, Statistics, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)., Unit records are not available	Government publicly funded alcohol and other drug treatment specialist services, national. Australian Mesothelioma Registry database	<p>The Australian Mesothelioma Registry (AMR) has been operational since 2011. The AMR was managed by the Cancer Institute New South Wales (CINSW) until 31 August 2017. Since then, the AMR has been managed by the AIHW. The AMR is funded by Safe Work Australia (SWA).</p> <p>Since 2011, the AMR has collected information on new cases of mesothelioma diagnosed in Australia from 1 July 2010. The eight state and territory cancer registries provide incidence and mortality data on new cases of mesothelioma to the AMR. These records include demographic information and details of diagnosis and death.</p> <p>The AMR also collects asbestos exposure information, obtained from consenting mesothelioma patients through a postal questionnaire and telephone interview. The postal questionnaire collects information on a patient's residential history, occupational history and family history of mesothelioma. The telephone interviews collect additional information, based on responses to the postal questionnaire, to assess the likelihood of asbestos exposure.</p>	1/07/2010	31/12/2020	National and State	Publications, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	The notifications data include all cases of mesothelioma diagnosed in Australia since 1 July 2010. Asbestos exposure data includes all consenting patients diagnosed with mesothelioma in Australia since 1 July 2010, who are physically and mentally able to participate. Child Protection National Minimum Dataset (CP NMDS)	<p>The Child Protection National Minimum Data Set (CP NMDS) is an annual collection of information on child protection in Australia. It contains data on children who come into contact with State and Territory departments responsible for child protection. The CP NMDS consists of the following data files: client demographics; notifications, investigations, and substantiations; care and protection orders; living arrangements, including children in funded out-of-home care; carer households; data for reporting on National Out-of-Home Care Standards measures; and safety in care. Where possible, data are also collected on sibling relationships.</p> <p>The CP NMDS collection was implemented in 2012–13. Prior to that a national aggregate child protection data collection was used for national child protection reporting (data for this collection began in 1990–91).</p> <p>Some data are still collected in aggregate format in Excel spreadsheets.</p> <p>The data are published annually by AIHW and are also used for the Report on Government Services.</p>	30/06/2012		National and State	Publications, Summary tables published in electronic form, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	Child protection notifications, investigations, and substantiations; care and protection orders; living arrangements, including children in funded out-of-home care; carer households; national out-of-home care standards; sibling relationships; safety in care. Community Aged Care Packages (CACP) Census	A census of Community Aged Care Package outlets and care recipients, covering one week of the year. Outlets were asked record assistance provided during 7 consecutive days within the period 16 September 2002 and 14 October 2002.	16/09/2002	14/10/2002	National	Publications	The census covers clients in whose name a subsidy is claimed AND supplementary clients (also known as excess clients) who are not generally recorded in the CACP administrative by-product data collection. Also contains information on service providers that participated in the census.	Official	Available on request	<p>https://www.aihw.gov.au/reports/aged-care/community-aged-care-packages-census-2002/contents/table-of-contents</p> <p>gen@aihw.gov.au</p>	gen@aihw.gov.au	Yes - Restricted access
Community Care	<p>This is administrative by product data for the Community Aged Care Packages (CACP) Program, Extended Aged Care at Home (EACH) packages and EACH-DEMENTIA (EACHD), and the Transition Care Packages Program. These are all programs designed to enable frail older people with complex care needs to continue living in the community. This is the source of the data for the publication by the AIHW on Community Aged Care packages which has its origins in CACP reporting. Transition care is Commonwealth/State funded but other programs receive recurrent Commonwealth funding.</p> <p>Home and Community Care (HACC) is reported annually by DoHA and reports are available on their website. The Institute receives a copy of the annual HACC MDS.</p>	30/06/1992	30/06/2009	National	Publications	All recipients of mainstream community aged care packages, EACH and EACHD programs and the Transition Care program.	Official	Available on request	gen@aihw.gov.au	gen@aihw.gov.au	Yes - Restricted access

Community Housing (CH) data collection	<p>The Community Housing (CH) data collection captures information about CH organisations, the dwellings they manage, and the tenants assisted.</p> <p>CH is rental housing for low- to moderate-income or special-needs households. It is managed by community-based organisations that lease properties from government or have received a capital or a recurrent subsidy from government. CH models vary across states and territories, and the housing stock may be owned by a variety of groups including government.</p> <p>The data are supplied by state and territory housing departments on an annual basis. Since 1996–97, the AIHW has compiled CH data from state and territory housing departments on an annual basis. These data help to describe the performance of the current National Housing and Homelessness Agreement and the former National Affordable Housing Agreement and Commonwealth-State Housing Agreement.</p> <p>The data collection has evolved over time. Changes have occurred to data collection scope, procedures, data items and underlying definitions and concepts.</p>	1/07/1996	30/06/2021	National and State	<p>Publications, Summary tables published in electronic form, Statistics, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)., There are restrictions and limitations governing the availability or use of other data in this holding.</p>	<p>CH includes tenancy (rental) units under management of a CH organisation, excluding Indigenous CH organisations. CH excludes dwellings:</p> <ul style="list-style-type: none"> • where the tenancy is managed under: Public Housing; State and Territory Owned and Managed Indigenous Housing; Indigenous CH; or the Crisis Accommodation Program. • no longer administered by a CH organisation at 30 June of the reference financial year (including dwellings demolished, sold or otherwise disposed of). • not yet available to CH organisations at 30 June of the reference financial year (e.g. under construction or being purchased). <p>Additional jurisdiction-specific inclusions and exclusions reflect: different definitions of CH in legislation; difficulties in identifying some organisations e.g. those not registered or funded by the state/ territory housing authority; inconsistencies in reporting e.g. inclusion of transitional housing and National Rental Affordability Scheme dwellings owned or managed by CH organisations.</p> <p>Currently:</p> <ul style="list-style-type: none"> • NSW, Vic, WA, SA, Tas and ACT supply unit record level data, including details on individuals, organisations, dwellings and associated tenancies of the organisations. • Qld supplies aggregate data supplemented by unit record administrative data for funded organisations, properties and current waitlist applications. • NT supplies finalised aggregate data, including dwelling and organisational level data, but not information on individual tenancies or persons. • Data are incomplete for some jurisdictions due to non/under-reporting by CH organisations. Disability Services National Minimum Data Set (DS NMDS)	<p>Since 1991, data was collected and reported on disability support services in Australia have been provided under four national disability agreements.</p> <p>The Commonwealth/State Disability Agreement Minimum Data Set (CSDA MDS) collection was set up as a 'snapshot' data collection in 1994, following the signing of the first CSDA in 1991.</p> <p>The second CSDA, signed in 1998, reflected significant changes which meant the CSDA MDS collection needed to be redesigned, including changing the collection to be a full year data collection.</p> <p>In 2002-03, the redeveloped CSDA MDS became the Commonwealth State/Territory Disability Agreement National Minimum Data Set (CSTDA NMDS), and the first full financial year of data collection took place between 1 July 2003 and 30 June 2004.</p> <p>The National Disability Agreement (NDA) replaced the CSTDA on 1 January 2009. As a result of the implementation of the NDA, from 2009-10 the CSTDA NMDS was renamed the DS NMDS.</p> <p>From 1 July 2013, state and territory-based disability support services provided under the NDA were progressively transitioned over to the National Disability Insurance Scheme (NDIS). This has meant that 2018-19 was the last year for which DS NMDS was data collected and reported.</p>	1/07/1994	30/06/2019	National and State	Publications, Data cubes, Summary tables published in electronic form, Statistics, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply). Medicare Benefits Schedule (MBS) data collection	<p>The Medicare Benefits Schedule (MBS) data collection contains information on services that qualify for a benefit under the Health Insurance Act 1973 and for which a claim has been processed. The database comprises information about MBS claims (including benefits paid), patients and service providers.</p> <p>AIHW has access to the complete dataset held by the Australian Government Department of Health and Aged Care for approved studies, including data linkage projects (see AIHW Data Integration Services Centre).</p> <p>The dataset is owned and managed by the Department of Health and Aged Care. The Department has issued a Public Interest Certificate approving AIHW access to MBS claims data for research and statistical purposes.</p> <p>The AIHW holds valuable data on a wide range of health and welfare topics and provides end-to-end data services to ensure strong evidence is available to the community, policymakers, researchers, and service providers. For more information, please see our services.</p>	1/02/1984		National	Publications, Summary tables published in electronic form, Statistics, Client specified tables on request which may be subject to data provider approval (charges apply), Unit records are not available, there are restrictions and limitations governing the availability or use of other data in this holding.	<p>MBS claims data are an administrative by-product of Services Australia administration of the Medicare fee-for-service payment system.</p> <p>MBS services are available to all Australian residents who hold a current Medicare card and overseas visitors from countries with which Australia has a Reciprocal Health Care Agreement (RHCA).</p>	Admin data	Not specifically available for this data collection, however, the metadata prepared for the 2013-14 extract provided to states and territories may be useful to users of the data.	<p>MBS online website (Department of Health and Aged Care)</p> <p>Statistics at Services Australia</p>	mbs.pbs@aihw.gov.au	
National (insulin-treated) Diabetes Register	The National (insulin-treated) Diabetes Register (NDR) aims to record all new cases of people who began to use insulin to treat their diabetes since 1 January 1999. The NDR includes people with type 1, type 2, gestational and other forms of diabetes. Data for the NDR are sourced from the National Diabetes Services Scheme (NDSS) and the Australasian Paediatric Endocrine Groups (APEG) state and territory registers. For more information about the NDR and how it is derived, see the Data Quality Statement	1/01/1999	31/12/2021	National; National and State	Publications, Summary tables published in electronic form, Statistics, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply). National Adoptions Data Collection	Aggregate data collected annually by financial year, are provided by state and territory departments responsible for adoptions and by the Department of Home Affairs. Information collected relates to children placed for adoption and those who had an adoption order finalised. Some data are also collected on children whose adoption order was finalised during the previous financial year. Collected data include characteristics of adopted children, their parents, and their adoptive families. Collected associated administrative process data include applications and vetoes for contact and information exchange, type of authority responsible for the adoption, type of consent provided for the adoption, median time for intercountry adoption processes, status of adoption orders at 30 June, and number of adoption specific visas issued. Data are published annually in the AIHW Adoptions Australia report series including online data visualisations, aggregate data tables, and in a topic summary for Australia's welfare.	1/07/1990		National and State	Publications, Data cubes, Summary tables published in electronic form, Unit records are not available	Data relate to children placed with adoptive families during a financial year and those who had an adoption order finalised during a financial year. National Rheumatic Heart Disease data collection	The National Rheumatic Heart Disease Data Collection (NRHDDC) comprises information from jurisdictional registers of notified cases of acute rheumatic fever/rheumatic heart disease (ARF/RHD). It is a de-identified population-based collection, initiated as part of the Australian Rheumatic Fever Strategy 2009, funded by the Australian Government Department of Health and Aged Care. The data collection will enable reporting on the Key Performance Indicators (KPIs) of the Strategy, reporting local level data to jurisdictional registers and supporting relevant data development activities. This will contribute to efforts to reduce the incidence of ARF and RHD in Australia, which are among the highest in the world. Data from NSW are sent to the AIHW also, though this is not funded through the RFS.	1/01/2016	31/12/2020	NSW; QLD; WA; SA; NT	Publications, Summary tables published in electronic form, Client specified tables on request which may be subject to data provider approval (charges apply)	The information collected is de-identified unit record data about living and deceased individuals affected by ARF and/or RHD. The collection contains demographic data (age, sex, Indigenous status), information about clinical diagnosis (diagnosis and notification dates), disease progression, clinical severity, secondary prophylaxis, and surgical management. The data will be used in at least four ways. - to monitor and report program effectiveness in the detection and management of ARF/RHD in Australia, as measured by the KPIs under the Rheumatic Fever Strategy. - for reporting against the relevant indicators in the Health Performance Framework report. - for reporting against the relevant indicators in the Better Cardiac Care report. - Regular (unpublished) jurisdictional-level data reports, as per jurisdictional requirements, to be supplied to individual jurisdictions. Pathways in Aged Care (PIAC) link map	The Pathways in Aged Care (PIAC) link map is a data asset derived by linking aged care activity data from the National Aged Care Data Clearinghouse (NACDC) and death records from the National Death Index (NDI). It includes activity data for aged care assessments, home support, home care, transition care and residential aged care. PIAC is suitable for person-based analysis of aged care pathways and patterns of program use over time. It links data from different aged care programs that do not use a common person identifier, enabling people's care use to be tracked across services. Derived analysis data sets are available for recipient demographics, event sequence and service locations.	1/07/1997	30/06/2020	National	Publications, Summary tables published in electronic form, Statistics, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	The PIAC link map includes all people who used Australian Government-funded aged care services – including assessments, home care and home support, flexible care and residential care – between 1 July 1997 and 30 June 2020. It includes death records for anyone in the cohort who died between 1 July 1997 and 31 December 2020. Quality in Australian Health Care Study (QAHCS) Reanalysed Database	QAHCS comprised a review of medical records of over 14,000 admissions in Australian hospitals in 1992, and estimation of the proportion of hospital separations associated with adverse events. For the purposes of the study, an adverse event was defined as an unintended injury or complication which results in disability, death or prolonged hospital stay, and is caused by health care management (rather than the patient's disease). Data on each adverse event identified in the review is contained in the database including information on the nature of the harm experienced by the patient and its consequences, and information on the circumstances in which the harm occurred.	1/01/1992	31/12/1992	NSW; SA	Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	QAHCS involved review of hospital medical records for 14,179 admissions to 28 hospitals in New South Wales and South Australia in 1992. Radiotherapy waiting times DSS pilot collection 2013-15	The main purpose of the Radiotherapy waiting times data set specification (RWT DSS) is to describe the information that must be collected to calculate the waiting times for the following time period in the treatment pathway for radiotherapy services in Australia: the time between the patient's ready-for-care date and the date of the first megavoltage external beam radiotherapy treatment.	1/07/2013	30/06/2015	National and State	Publications, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	Establishments in scope are those healthcare establishments that provide megavoltage external beam radiotherapy treatment (in-scope radiotherapy treatment). Both public and private establishments are in scope. While it is mandatory for public establishments to report data to the collection, private providers are also encouraged to participate. The scope is not limited by patient diagnosis: it includes people with cancer (notifiable and non-notifiable) and people who do not have cancer. People in scope are those who started a course of radiotherapy treatment within the reference period. For public establishments, all in-scope activity should be reported, including services provided by specialists operating under right of private practice arrangements.	Admin data	Radiotherapy waiting times DSS 2013-15: http://meteor.aihw.gov.au/content/index.phtml/itemId/517220	http://www.aihw.gov.au/publication-detail/?id=60129553437 http://www.aihw.gov.au/publication-detail/?id=60129557385	hpis@aihw.gov.au	
Radiotherapy waiting times National Minimum Data Set	The National Radiotherapy Waiting Times Database is a collation of records related to courses of radiotherapy that began in a reference period. The data collected includes administrative details, patient demographic characteristics and some clinical information. The database was primarily designed to enable reporting of waiting times for radiotherapy services which are calculated as the time between the patient's ready-for-care date and the date of the first megavoltage external beam radiotherapy treatment.	1/07/2015	30/06/2019	National and State	Publications, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).	Establishments in scope are those healthcare establishments that provide megavoltage external beam radiotherapy treatment (in-scope radiotherapy treatment). Both public and private establishments are in scope. While it is mandatory for public establishments to report data to the national minimum data set (NMDS), private providers are also encouraged to participate. The scope is not limited by patient diagnosis: it includes people with cancer (notifiable and non-notifiable) and people who do not have cancer. People in scope are those who started a course of radiotherapy treatment within the reference period. For public establishments, all in-scope activity should be reported, including services provided by specialists operating under right of private practice arrangements. Residential Aged Care	This database contains administrative by product data for the residential aged care since the Aged Care System Reforms of 1997. This is the source of data on residential aged care that is published in the AIHW Aged Care Statistics series. The data base consists of a selection of files from the DoHA warehouse - ACCMIS (Aged and Community Care Management Information System). From 2013, this collection is effectively inactive, as relevant data are included in the National Aged Care Data Clearinghouse.	30/06/1999	30/06/2012	National	Publications, Data cubes, Summary tables published in electronic form, Statistics, Client specified tables on request which may be subject to data provider approval (charges apply)	All residents in residential aged care at the 1997 change and new admissions since then. The payment system from which the data is derived was developed from the Nursing home payment system. Consequently, a fuller history of clients with nursing home exposure is available but in general pre reform hostel detail is not available through ACCMIS. Risk Factor Prevalence Survey Data Collection	There were three Risk Factor Prevalence Surveys (RFPS) run in 1980, 1983 and 1989. These surveys gathered information about the prevalence of heart disease risk factors in adult Australians living in State and Territory capital cities. The surveys gathered self-reported health and demographic information, measured height, weight and blood pressure and collected blood samples for analysis. In all three surveys the blood samples were tested for total cholesterol, HDL cholesterol and triglyceride levels. For the 1989 survey additional analysis of the blood samples was carried out to test blood iron, ferritin and transferrin levels.	1/05/1980	1/06/1989	National	Publications, there are restrictions and limitations governing the availability or use of other data in this holding.	For the 1980 and 1983 survey participants were adults aged 25-64 years randomly selected from the electoral roll and recruited from defined catchment areas in the 6 State capitals. Canberra and Darwin were excluded. For the 1989 survey participants were adults aged 20-69 years recruited from defined catchment areas in the 6 State capitals, as well as Canberra and Darwin. Specialist Homelessness Services Collection (SHSC)	The SHSC collects information about people who are referred to, or seek assistance from, specialist homelessness services (SHS) agencies. These services collect the data on an ongoing basis and are responsible for submitting the data to the AIHW on a monthly basis. There are two parts to the SHSC — a Client collection and an Unassisted Persons collection. <ul style="list-style-type: none"> The Client collection captures information on adults and children who receive a service from an SHS agency. The Unassisted Person collection is used to gain information about adults and children whose request for service is not able to be met by an SHS agency. 	1/07/2011		National and State	Publications, Data cubes, Summary tables published in electronic form, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)., There are restrictions and limitations governing the availability or use of other data in this holding.	Client collection - The base unit is a person who presents to an SHS agency requesting services. A person becomes a 'client' once they receive a service(s). A 'support period' is the period of time a client receives assistance from a SHS agency. It relates to the provision of a service and/or supported accommodation. During a support period, a range of services additional to supported accommodation can be provided. Detail on types of services provided is also available. Unassisted persons collection - Comprises information on the number of instances where a person received no immediate services from a SHS agency. Details of all agencies participating in the SHSC are on the Specialist Homelessness Establishment Database file. Information is submitted to the AIHW monthly. Supported Accommodation Assistance Program Data Collection	<p>The Specialist Homelessness Services Collection (SHSC) replaced the SAAP National Data Collection (NDC) on 1 July 2011. For key differences between the SAAP NDC and SHSC, see Appendix D of Specialist Homelessness Services 2011–12 (AIHW website).</p> <p>The SAAP NDC provided nationally consistent information on SAAP clients and services from July 1996 to June 2011. It was jointly funded by Commonwealth, state and territory governments and comprised three main collections:</p> <ul style="list-style-type: none"> • Client collection – the main component, captured socio-demographic information about clients receiving support under SAAP, services required by and provided to each client, and client circumstances before and after receiving support. • Demand for accommodation collection – which operated over a 1-week period, twice yearly. It captured information about the number of people who requested accommodation at SAAP agencies, which requests were met, and reasons for this. • Administrative collection – collated from information obtained by state and territory government departments in the course of administering the SAAP program. It captured descriptive information about SAAP agencies. The following special issues collections were also undertaken as part of the SAAP NDC: <ul style="list-style-type: none"> • Casual client collection – discontinued from the SAAP NDC in June 2005 when the definitions of client and support period were changed so that many people previously counted as casual clients would be counted in the Client collection from 1 July 2005. • Accompanying child in SAAP collection – collected information about the children who accompanied an adult and received assistance under SAAP between 21 May and 30 June 1998. • Income issues collection – collected information on SAAP clients with no/very low income. It was conducted from May to June 2000. <p>A number of methodological changes to the SAAP NDC occurred over time. Refinements to data items introduced in July each year are summarised in the annual reports for the data collection, available from the AIHW website. In particular, in 2005–06 a Core Data Set was introduced (collecting fewer data items, introducing a new statistical linkage key and incorporating changes to some definitions) and from 2000–01, the Client Collection captured demographic and support information for each child requiring assistance.</p> <p>The AIHW continues to hold data collected through the following surveys of SAAP agencies conducted by the AIHW outside of the SAAP NDC:</p> <ul style="list-style-type: none"> • High and complex needs census (June 2008). • Youth homelessness pilot programme collection (1 July 1997 to 31 December 1999). • NSW access and exiting project collection (23 August to 1 September 2002). 	1/07/1996	30/06/2011	National and State	Publications, Summary tables published in electronic form, Statistics, Client specified tables on request which may be subject to data provider approval (charges apply), Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)., There are restrictions and limitations governing the availability or use of other data in this holding.	The scope of SAAP NDC data varied by collection component and over time. For more information, refer to the annual reports for the data collection, available from the AIHW website. Younger people with disability in residential aged care (YPIRAC)	The Younger people with disability in residential aged care (YPIRAC) program was agreed by the Council of Australian Governments (COAG) on 10 February 2006 with the aim of delivering sustained reductions in the number of younger people with disability in residential aged care. The YPIRAC program operated under a 5-year agreement between the Australian Government and state and territory governments. The program was funded through the states and territories and administered by the Australian Government Department of Families, Housing, Community Services, and Indigenous Affairs (FaHCSIA). The AIHW was contracted by FaHCSIA to develop a YPIRAC Minimum Data Set (MDS), and to complete the MDS over the 5-year collection periods. YPIRAC data collected concluded in 2010-11.	1/07/2006	30/06/2011	National and State	Publications, Summary tables published in electronic form, there are restrictions and limitations governing the availability or use of other data in this holding.
