
Mortality Over Regions and Time (MORT) books

The MORT books present data for 2013–2017. Due to changes in geographic classifications over time, long-term trends are not available.

MORT books are available for the following:

[Greater Capital City Statistical Areas \(GCCSA\), 2013–2017](#)

[Download Greater Capital City Statistical Areas \(GCCSA\), 2013–2017. Format: XLSX 384Kb XLSX 384Kb](#)

[Primary Health Network \(PHN\), 2013–2017](#)

[Download Primary Health Network \(PHN\), 2013–2017. Format: XLSX 754Kb XLSX 754Kb](#)

[Local Government Area \(LGA\), 2013–2017](#)

[Download Local Government Area \(LGA\), 2013–2017. Format: XLSX 3.6Mb XLSX 3.6Mb](#)

[Remoteness area, 2013–2017](#)

[Download Remoteness area, 2013–2017. Format: XLSX 274Kb XLSX 274Kb](#)

[Socioeconomic group, 2013–2017](#)

[Download Socioeconomic group, 2013–2017. Format: XLSX 265Kb XLSX 265Kb](#)

[State and territory, 2013–2017](#)

[Download State and territory, 2013–2017. Format: XLSX 299Kb XLSX 299Kb](#)

[Statistical Area Level 4 \(SA4\), 2013–2017](#)

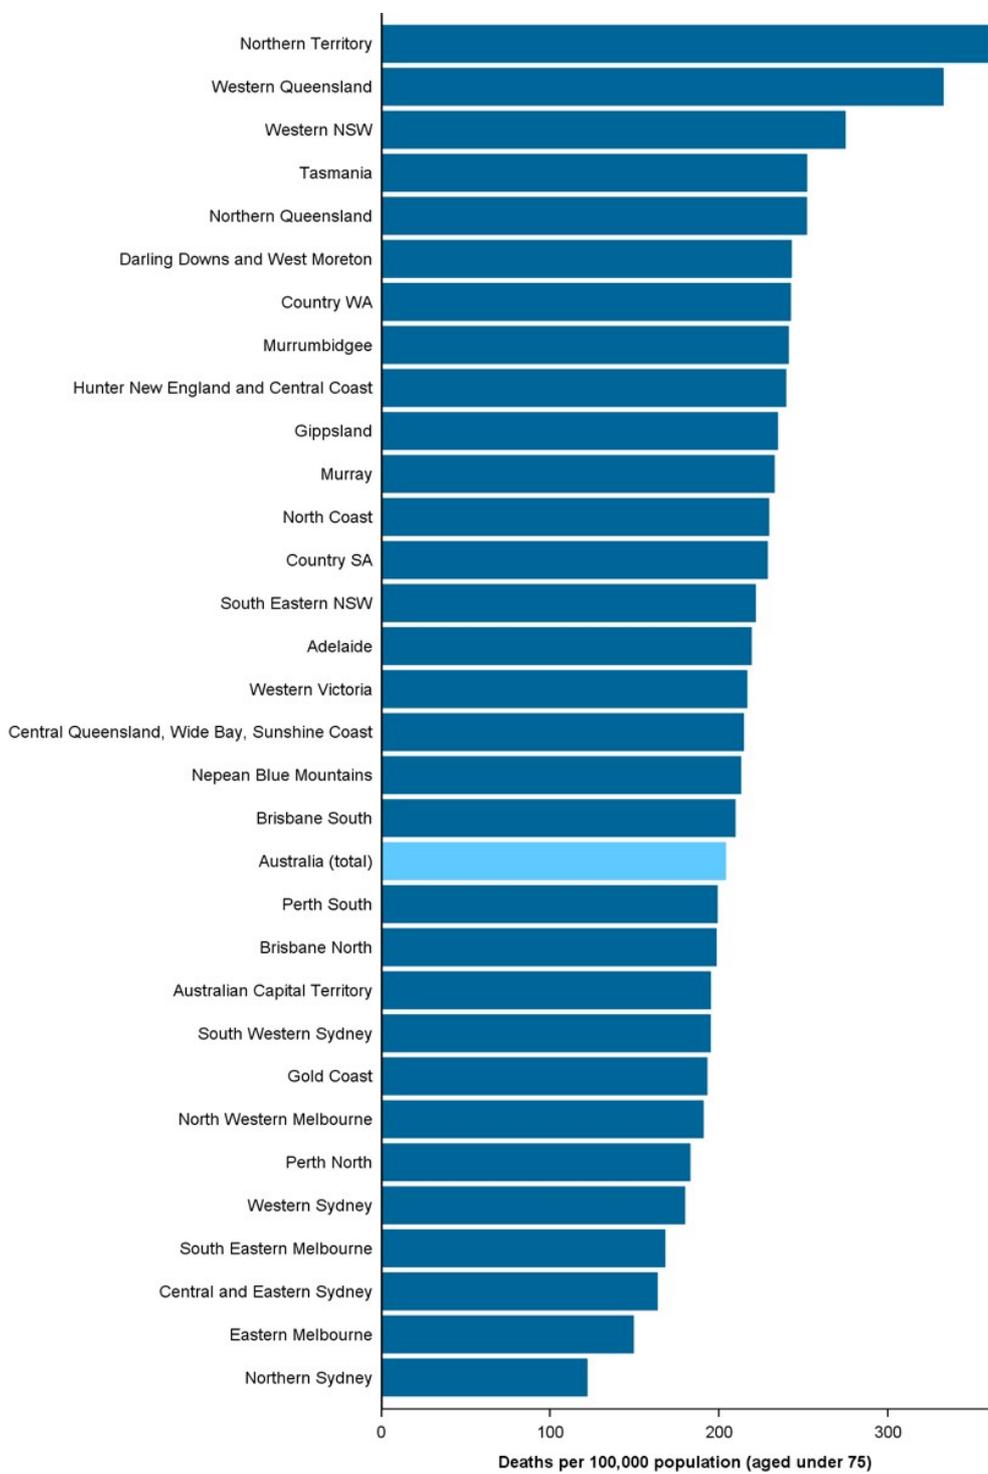

[Download Statistical Area Level 4 \(SA4\), 2013–2017. Format: XLSX 801Kb XLSX 801Kb](#)

[Statistical Area Level 3 \(SA3\), 2013–2017](#)

[Download Statistical Area Level 3 \(SA3\), 2013–2017. Format: XLSX 2.4Mb XLSX 2.4Mb](#)

Where possible, MORT books include graphical representations of age-standardised rates, premature deaths, potentially avoidable deaths and rate ratios for selected causes of death. For example:

Figure 1: Age-standardised rate of premature deaths (aged under 75), by Primary Health Network, 2017

Notes

How does the AIHW maintain security and privacy of information it holds about people?

The AIHW operates under a strict privacy regime which has its basis in section 29 of the Australian Institute of Health and Welfare Act 1987 (AIHW Act) and the Privacy Act 1988 (Privacy Act). For more information, see Privacy of data.

In addition, a range of AIHW policies ensure the security of its data holdings including:

- multi-layered and extensive privacy protection and disclosure prevention protocols; accredited and secure information and communication technology infrastructure.
- information security policies that cover privacy, information gathering and receipt; information storage, retention and destruction; information transmission, retrieval and use within the AIHW; conditions applying to data linkage projects; information release and disclosure outside the AIHW; monitoring and audits; and breaches and sanctions.
- security and business policies relating to physical security; work environment security; building security; use of electrical equipment and information and communication technology systems; data storage security arrangements; information security classification; security risk management policy; business continuity plan; business risk assessment; incident response procedures; and visitor management.
- a sound governance framework including independent oversight bodies such as the AIHW Ethics Committee.
- working within legislative requirements.
- using AIHW data custodians to manage data access and use; executive level clearance of outputs and statistical confidentialisation processes.
- processes to minimise the risk of identifying an individual in statistical outputs.

Coverage and processing of deaths data

For a more detailed description of the coverage and processing of deaths data, including deaths certified by the coroner, refer to the Explanatory Notes in ABS *Causes of death, Australia* (ABS Catalogue No. 3303.0), which is available from the [ABS website](#).

Machine readable forms of Excel workbooks

MORT and GRIM data have been extracted in machine readable form and are available on data.gov.au
