

# List of tables

Table 1:	Average number of dentist visits supplied per year by sex and age, 1983–84 to 2003–04 .....	11
Table 2:	Allied dental labour force: selected characteristics, Australia, 2003 .....	12
Table 3:	Estimated number of dental visits supplied per annum per allied dental practitioner .....	14
Table 4:	Previous baseline and projected number of practitioners and visits, 2000 and 2010 .....	15
Table 5:	Baseline data for the dentist labour force in 2000 and comparison of previous projections with actual practising dentists by sex, 2003.....	16
Table 6:	Expected and observed estimates for recruitment vectors.....	17
Table 7:	Baseline data for the allied dental labour force in 2000 and comparison of previous projections with actual employed allied dental practitioners, 2003 .....	17
Table 8:	Revised recruitment vector for dentist projections by sex .....	19
Table 9:	Revised recruitment vector for allied dental practitioners (baseline 2003).....	21
Table 10:	Projected number of practitioners by occupational group, 2005, 2010, 2015 and 2020 .....	21
Table 11:	Dentate per capita demand by age group and year, 1979 to 2005.....	27
Table 12:	The impact of increases in numbers of dentistry course completions, projected number of dentists, dentists per 100,000 population and total dental visits supplied, 2005, 2010, 2015 and 2020 .....	34
Table 13:	The impact of changes in the hygienist to therapist graduate ratio on the projected numbers of therapists and hygienists and contribution of total allied dental visits to total dental supply, 2005, 2010, 2015 and 2020 .....	36
Table 14:	The impact of increasing therapist/hygienist graduate numbers from 2010 on the projected contribution of allied dental visits to total dental supply, 2005, 2010, 2015 and 2020 .....	37
Table 15:	The impact of changes in the numbers of ADC candidates, projected number of dentists and dental visits supplied, 2005, 2010, 2015 and 2020 .....	38
Table 16:	The impact of changes in attrition rates of dentists aged 50 to 64 years, projected numbers of dentists and visits supplied, 2005, 2010, 2015 and 2020 .....	39
Table 17:	The impact of declining female attrition rates, projected number of dentists and dental visits supplied, 2005, 2010, 2015 and 2020 .....	40
Table 18:	The impact of changes in productivity and projected number of visits supplied, 2005, 2010, 2015 and 2020.....	41
Table 19:	Projected demand for dental visits if access increased for dentate persons currently not accessing care in a 12-month period, 2005, 2010, 2015 and 2020 .....	46

Table 20: Projected demand for dental visits if access increased for dentate persons aged 18 to 54 years, 2005, 2010, 2015 and 2020.....	47
Table 21: Projected demand for dental visits if access increased for dentate persons aged 55 years or older, 2005, 2010, 2015 and 2020 .....	48
Table 22: Projected demand for dental visits if dental insurance coverage altered, 2005, 2010, 2015 and 2020 .....	49
Table 23: Projected demand for dental visits if regional dwelling dentate persons accessed dental care at the same rate as those in capital city areas, 2005, 2010, 2015 and 2020 .....	51
Table A.1: Registered dentists by work status, sex and age group, Australia, 2003.....	59
Table A.2: Practising dentists by sex, age group and state/territory, 2003 .....	60
Table A.3: Practising dentists by area of main practice by sex and age, Australia, 2003.....	62
Table A.4: Practising dentists by type of main practice and age, Australia, 2003.....	63
Table A.5: Employed dental prosthetists, selected characteristics by state/territory, 2000 and 2003 .....	63
Table A.6: Employed dental therapists, selected characteristics by state/territory, 2000 and 2003 .....	64
Table A.7: Employed dental hygienists, selected characteristics by state/territory, 2000 and 2003 .....	64
Table B.1: Long-term overseas arrivals to Australia of entrants with United Kingdom, Ireland or New Zealand citizenship and stated dentistry as their profession, 2000 to 2006.....	69
Table B.2: Australian citizen dentists arriving in Australia after a long-term stay abroad, by age group, 2000 to 2006.....	70
Table B.3: Percentage of practising dentists returning to practice after a cessation of practice .....	70
Table B.4: Dentist recruitment vector (standard projection) by age group and sex.....	71
Table B.5: Dentist attrition rates and transition probabilities by age group and sex (standard projection).....	72
Table B.6: Allied dental recruitment vector by age group and sex .....	73
Table B.7: Allied dental practitioner attrition rates and transition probabilities by age group and sex (standard projection) .....	74
Table C.1: Australian / New Zealand citizens and permanent residents commencing courses in dentistry by sex and institution, 1994 to 2004.....	76
Table C.2: Australian / New Zealand citizens and permanent residents completing courses in dental studies by sex and institution, 1993 to 2003.....	77
Table C.3: Australian / New Zealand citizens and permanent residents completing courses in dental studies by age and sex, 1994 to 2003 .....	78

Table D.1: Standard projection: projected number of practising dentists by age group and sex, 2003 to 2020 .....	79
Table D.2: Dentists' capacity to supply visits per annum by sex and age group, 2005 to 2020, assuming productivity continues to decline at 50% of the rate of the decline observed in the period 1983–84 to 2003–04 .....	80
Table D.3: Standard projection: projected number of dental visits supplied ('000s) by practising dentists, sex and age of dentist, 2003 to 2020 .....	81
Table D.4: Projected number of employed allied dental practitioner projections and number of visits supplied, 2005 to 2020 .....	82
Table D.5: Dentists' capacity to supply dental visits per annum by sex and age group, 2005 to 2020, assuming productivity continues to decline at 100% of the rate of the decline observed in the period 1983–84 to 2003–04 .....	83
Table D.6: Projected number of dental visits (millions) by additional graduates scenario, age group and sex, 2005, 2010, 2015 to 2020.....	84
Table D.7: Projected number of dental visits supplied (millions) by ADC scenarios, age group and sex, 2005, 2010, 2015 to 2020 .....	85
Table D.8: Projected number of dental visits supplied (millions) by attrition scenario, age group and sex, 2005, 2010, 2015 to 2020 .....	86
Table D.9: Projected number of dental visits supplied (millions) by productivity scenario, age group and sex, 2005, 2010, 2015 to 2020.....	87
 Table E: Australian Bureau of Statistics estimated resident population, 2003 to 2020 (Series 8).....	 88
 Table F.1: Projected percentage of edentulous persons, 2005 to 2020.....	 90
Table F.2: Dentate per capita demand for dental visits by growth assumption and age group, 2005 to 2020.....	91
Table F.3: Edentulous per capita demand for dental visits by growth assumption and age group, 2005 to 2020 .....	92
 Table G.1: Demand projections for dental visits (millions) by assumptions of growth in per capita demand, 2005, 2010, 2015 and 2020 .....	 93
Table G.2: Demand projections for dental visits (millions) by access scenario, 2005, 2010, 2015 and 2020.....	93
Table G.3: Demand projections for dental visits (millions) by access scenario, 18 to 54 years of age, 2005, 2010, 2015 and 2020 .....	94
Table G.4: Demand projections for dental visits (millions) by access scenario, 55 years or older, 2005, 2010, 2015 and 2020 .....	94
Table G.5: Demand projections for dental visits (millions) by scenario, 2005, 2010, 2015 and 2020 .....	95
 Table H: Projected supply of dental visits by multiple scenarios, 2020.....	 96
