<b>Adult Vaccination Survey Data Collection</b>	Information about vaccination of adults for the following conditions: influenza, pneumonia, tetanus, shingles. The 2009 survey also gathered information about vaccination for pertussis ('whooping cough') and the pandemic (H1N1) virus, also known as 'swine flu'. The survey was run seven times between 2000 and 2010. The AIHW holds the data for 2002, 2004, 2006 and 2009/10.	1/01/2002	31/12/2010	National	<ul style="list-style-type: none"> <li>Publications</li> <li>Restrictions and limitations govern the availability or use of other data in this holding.</li> </ul>	The survey scope is a nationally representative sample of adults. Age ranges vary by survey. <b>Alcohol and Other Drug Treatment Services National Minimum Data Set (AODTS NMDS)</b>	The AODTS NMDS emanated from the national forum 'treatment and research - where to from here?' held in 1995 by the Alcohol and Other Drugs Council of Australia. In December 1999 the Commonwealth and state and territory governments through the then National Health Information Management Group endorsed a version of the AODTS NMDS for collection to commence on 1 July 2000. The first data were collected for 2000-01, considered a pilot year. The data from 2001-02 onwards contain information about alcohol and other drug treatment services, the clients who use these services, the types of drug problems for which treatment is sought, and the types of treatment provided.	1/07/2000	30/06/2018	National National and State Other	<ul style="list-style-type: none"> <li>Publications</li> <li>Data cubes</li> <li>Summary tables published in electronic form</li> <li>Statistics</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)</li> <li>Unit records not available</li> </ul>	Government publicly-funded alcohol and other drug treatment specialist services, national. <b>Australian Burden of Disease Database</b>	Established as part of the Australian Burden of Disease Study 2011 to set up the relevant infrastructure to enable efficient and timely ongoing updates by the AIHW.	1/01/2003	31/12/2011	National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Unit records not available</li> </ul>	Includes national and Indigenous burden of disease estimates for 2003 and 2011, including Years of life lost (YLL), Years lived with disability (YLD) and Disability-adjusted life years (DALY) for around 200 diseases included in the Australian Burden of Disease Study 2011. Subnational estimates (state/territory, remoteness and socioeconomic group) are available for 2011. National and Indigenous estimates of attributable burden due to the selected risk factors included in the study are available for 2003 and 2011. Data are available by 5 year age group and sex.	Calculated estimates using burden of disease methodology	<a href="#">ABDS 2011 quality information available in methods publications (AIHW website)</a>	<a href="#">Burden of disease and related publications (AIHW website)</a>	burdenofdisease@aihw.gov.au
<b>Australian Cancer Database (ACD)</b>	The ACD contains data about all new cases of cancer diagnosed in Australia since 1 January 1982, excluding basal and squamous cell carcinomas of the skin. Cancer is a notifiable disease in all Australian states and territories. The relevant legislation requires certain individuals and organisations to notify all new cases of cancer to the jurisdiction's central cancer registry. These registries supply data annually to the AIHW, which cleans and standardises the data and notifies the registries of inter-state duplicates.	1/01/1982	31/12/2014	National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Statistics</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)</li> <li>Restrictions and limitations govern the availability or use of data in this holding.</li> </ul>	<p>The Australian Cancer Database (ACD) is a data collection of all primary, malignant cancers diagnosed in Australia since 1/1/1982.</p> <p>The following exclusions apply to the ACD:</p> <ul style="list-style-type: none"> <li>Tumours diagnosed as benign or of borderline malignancy are not included.</li> <li>Only the first occurrence of a cancer is included. That is, recurrences and metastases are not included.</li> <li>Basal cell carcinomas (BCC) and squamous cell carcinomas (SCC) of the skin are not included because they are not notifiable diseases.</li> <li>National data on non-melanoma skin cancers, besides BCC and SCC, are complete from 2001 only.</li> <li>Data on myelodysplastic syndromes and some myeloproliferative cancers are complete from 2003 only.</li> </ul>	Official	<a href="#">Latest ACD DQS</a>	<a href="#">Australian Cancer Database (AIHW website)</a>	cancer@aihw.gov.au

<b>Australian Government housing data set (AGHDS)</b>	The AGHDS is a confidentialised unit record file that provides point-in-time data for income units in receipt of Centrelink social security payments and families receiving Family Tax Benefit (FTB) Part A.	30/06/2006	30/06/2017	National and State	<ul style="list-style-type: none"> <li>• Publications</li> <li>• Summary tables published in electronic form</li> <li>• Statistics</li> <li>• Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>• Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)</li> <li>• Restrictions and limitations govern the availability or use of data in this holding.</li> </ul>	Combines information from numerous Centrelink files to create records at an income unit level, rather than person or household level. An income unit consists of a person, the person's partner and any children for whom the couple may receive FTB Part A. Single social security recipients living together in the same household are regarded as separate income units. One person in each income unit is classified as the primary reference person based on sex and the type of payment received.  Includes information about type of housing, amount of weekly income, payment type and other characteristics of income units.	Admin data	A data dictionary is available on request	<a href="#">Housing Assistance in Australia</a>	<a href="mailto:housing@aihw.gov.au">housing@aihw.gov.au</a>
<b>Australian Infant Feeding Survey (ANIFS) 2010</b>	The 2010 ANIFS gathered information about infant feeding practices and attitudes from a sample of mothers and carers in Australia. The survey gathered information about the prevalence and duration of breastfeeding and collected information on other foods consumed by infants. The survey also gathered information about barriers to initiating and continuing breastfeeding and gathered information about perinatal depression.	1/03/2010	31/03/2011	National	<ul style="list-style-type: none"> <li>• Publications</li> <li>• Restrictions and limitations governing the availability or use of other data in this holding.</li> </ul>	Mothers or primary carers of infants aged up to 24 months. Sample selected from the Medicare enrolment database.	Survey		<a href="#">2010 ANIFS indicator results</a>  Researchers can access a free confidentialised unit record file through the Australian Data Archive: <a href="#">ADA social science 01244</a>	<a href="mailto:pophealth2@aihw.gov.au">pophealth2@aihw.gov.au</a>
<b>Australian Mesothelioma Registry database (AMR)</b>	The AMR has been operational since 2011. It was managed by the Cancer Institute New South Wales until 31 August 2017. Since then, the AMR has been managed by the AIHW. The AMR is funded by Safe Work Australia (SWA).  Contains information on new cases of mesothelioma diagnosed in Australia from 1 July 2010. The eight state and territory cancer registries provide incidence and mortality on new cases of mesothelioma to the AMR. These records include demographic information and details of diagnosis and death.  The AMR also collects asbestos exposure information, obtained from consenting mesothelioma patients through a postal questionnaire and telephone interview. The postal questionnaire collects information on a patient's residential history, occupational history and family history of mesothelioma. The telephone interviews collect additional information, based on responses to the postal questionnaire, to assess the likelihood of asbestos exposure.	1/07/2010	31/12/2016	National and State	<ul style="list-style-type: none"> <li>• Publications</li> <li>• Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>• Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	Notifications data include all cases of mesothelioma diagnosed in Australia since 1 July 2010. Asbestos exposure data includes all consenting patients diagnosed with mesothelioma in Australia since 1 July 2010, who are physically and mentally able to participate.	Admin data and Survey		Additional information is available on the <a href="#">AMR website</a>	<a href="mailto:cancer@aihw.gov.au">cancer@aihw.gov.au</a>
<b>Australian Spinal Cord Injury Register (ASCIR)</b>	The register enables measurement of spinal cord injury incidence, study of circumstances and mechanisms. Data on first and subsequent admissions, from 1 July 1995, to any of the six specialised spinal units in Australia are being registered prospectively.	1/07/1995	30/06/2015	National	<ul style="list-style-type: none"> <li>• Publications</li> <li>• Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>• Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	ASCIR is an opt-in national register of incident cases of spinal cord injury which occur in Australia and overseas to Australian residents if they are treated in a spinal unit in Australia. Currently, 7 spinal units, all based in public hospitals, contribute data.	Admin data	Not currently available	<a href="#">Spinal cord injury, Australia 2014–15</a>	<a href="mailto:hpis@aihw.gov.au">hpis@aihw.gov.au</a>

<b>Child Protection National Minimum Dataset (CP NMDS)</b>	<p>The CP NMDS is an annual collection of information on child protection in Australia. It contains data on children who come into contact with state and territory departments responsible for child protection including: notifications, investigations and substantiations; care and protection orders; funded out-of-home care; and data for reporting on the National Standards for Out-of-Home Care. Data relating to carer households are also collected.</p> <p>The CP NMDS was implemented in 2012–13. Prior to this, a national aggregate child protection data collection was used for national child protection reporting (data for this collection began in 1990–91). Some data are still collected in aggregate format in Excel spreadsheets.</p> <p>The data are published annually by AIHW and are also used for the Report on Government Services.</p>	30/06/2012	30/06/2017	National National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	Child protection notifications, investigations and substantiations; care and protection orders; living arrangement; out-of-home care; carer households; NOOHCS; carers	Admin data	<a href="#">Child protection NMDS 2016–17</a>  <a href="#">Child Protection NMDS 2016–17 DQS</a>	<a href="#">Child protection Australia 2016–17</a>  <a href="#">Report on Government Services</a>  <a href="#">Australia's Welfare</a>	<a href="mailto:child.protection@aihw.gov.au">child.protection@aihw.gov.au</a>
<b>Community Housing data collection (CH)</b>	<p>The CH data collection captures information about community housing organisations, the dwellings they manage and the tenants assisted. Limited financial information from the previous financial year is also collected.</p> <p>Community housing (CH) is rental housing for low- to moderate-income or special-needs households. It is managed by community-based organisations that have received capital or a recurrent subsidy from government. CH models vary across states and territories, and the housing stock may be owned by a variety of groups including government.</p> <p>Since 1996–97, the AIHW has compiled CH data from state and territory housing authorities on an annual basis. These data help to describe the performance of the current National Housing and Homelessness Agreement and the former National Affordable Housing Agreement and Commonwealth-State Housing Agreement.</p> <p>The data collection has evolved over time. Changes have occurred to data collection scope, procedures, data items and underlying definitions and concepts. In particular, unit record data has been progressively collected since 2003–04.</p>	1/07/1996	1/06/2017	National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Statistics</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)</li> <li>Restrictions and limitations govern the availability or use of data in this holding.</li> </ul>	<p>CH includes tenancy (rental) units under management of a CH organisation, excluding Indigenous CH organisations.</p> <p>CH excludes dwellings:</p> <ul style="list-style-type: none"> <li>where the tenancy is managed under: Public Housing; State and Territory Owned and Managed Indigenous Housing; Indigenous CH; or the Crisis Accommodation Program.</li> <li>no longer administered by a CH organisation at 30 June of the reference financial year (including dwellings demolished, sold or otherwise disposed of).</li> <li>not yet available to CH organisations at 30 June of the reference financial year (e.g. under construction or being purchased).</li> </ul> <p>Additional jurisdiction-specific inclusions and exclusions reflect: different definitions of CH in legislation; difficulties in identifying some organisations e.g. those not registered or funded by the state/ territory housing authority; inconsistencies in reporting e.g. inclusion of transitional housing and National Rental Affordability Scheme dwellings owned or managed by CH organisations.</p> <p>Currently: NSW, Vic, WA, SA, Tas and ACT supply unit record level data, including details on individuals, organisations, dwellings and associated tenancies of the organisations; Qld supplies aggregate data supplemented by unit record administrative data for funded organisations, properties and current waitlist applications; NT supplies finalised aggregate data, including dwelling and organisational level data, but not information on individual tenancies or persons; Data are incomplete for some jurisdictions due to non/under-reporting by CH organisations.</p>	Admin data	<a href="#">CH DSS</a> <a href="#">CH DQS</a>	<a href="#">Housing assistance in Australia</a>  <a href="#">Report on Government Services</a>  <a href="#">Australia's Welfare</a>	<a href="mailto:housing@aihw.gov.au">housing@aihw.gov.au</a>

<b>Disability Services National Minimum Data Set (DS NMDS)</b>	<p>Since 1991, disability support services in Australia have been provided under four national disability agreements.</p> <p>The Commonwealth/State Disability Agreement Minimum Data Set (CSDA MDS) was set up as a 'snapshot' data collection in 1994, following signing of the first CSDA in 1991. The second CSDA (1998), reflected significant changes which meant the CSDA MDS needed to be re-designed, including changing the collection to a full-year data collection. In 2002-03, the redeveloped CSDA MDS became the Commonwealth State/Territory Disability Agreement National Minimum Data Set (CSTDA NMDS), and the first full financial year of data collection took place between 1 July 2003 and 30 June 2004.</p> <p>The National Disability Agreement (NDA) replaced the CSTDA on 1 January 2009. As a result, from 2009-10 the CSTDA NMDS was renamed the DS NMDS.</p>	1/07/1994	30/06/2017	National and State	<ul style="list-style-type: none"> <li>• Publications</li> <li>• Data cubes</li> <li>• Summary tables published in electronic form</li> <li>• Statistics</li> <li>• Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>• Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	Covers specialist disability support services provided under the National Disability Agreement. <b>Indigenous Community Housing (ICH) data collection</b>	<p>The ICH data collection captures information about Indigenous community housing organisations (ICHOs), the dwellings they manage and tenants assisted. ICHOs include community organisations such as resource agencies and land councils, which may have a range of functions, provided that they manage housing for Indigenous people. ICHOs may either directly manage the dwellings they own or sublease tenancy management services to the relevant state/territory housing authority or another organisation.</p> <p>Since 2005–06, the AIHW has compiled ICH data from state and territory housing authorities on an annual basis. These data help to describe the performance of the current National Housing and Homelessness Agreement and the former National Affordable Housing Agreement and Commonwealth-State Housing Agreement.</p> <p>The data collection has evolved over time, including changes to the data collection scope, procedures, data items and underlying definitions and concepts. <b>Pathways in Aged Care 2014 link map</b>	Data from aged care service programs, ACAT assessments and the National Death Index (NDI) have been linked to create the Pathways in Aged Care (PIAC) link map. The database is suitable for person-based analysis of aged care pathways and patterns of program use over time. PIAC 2014 covers aged care assessments and use of key aged care service programs, as well as deaths from 1 July 1997 to 30 June 2014. The programs included are: Aged Care Assessment Program (ACAP); Residential aged care (RAC); Aged care package programs (CACP/EACH/EACHD and the Home Care Packages Programme which replaced these earlier programs in August 2013); Transition Care Program (TCP); Home and Community Care (HACC). Deaths data are from the NDI.  PIAC 2014 contains the link maps between the PIAC person id and records in the National Aged Care Data Clearinghouse (NACDC) tables, the HACC schema tables and the NDI. Tables with preferred demographics and a list of care events (cleaned for date overlap) for PIAC person id have been derived.	1/07/1997	30/06/2014	National	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Statistics</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)</li> <li>Restrictions and limitations govern the availability or use of data in this holding.</li> </ul>	PIAC 2014 generally covers aged care assessments and use of key aged care service programs, and deaths from 1 July 1997 to 30 June 2014.  Data are not available for all years for all programs: <ul style="list-style-type: none"> <li>ACAP: partial coverage of assessments for 2003-04 and 2004-05. <b>Specialist Homelessness Services Collection (SHSC)</b>	<p>The SHSC collects information about people who are referred to, or seek assistance from, specialist homelessness services (SHS) agencies. These services collect data on an ongoing basis and are responsible for submitting data to AIHW on a monthly basis.</p> <p>There are two parts to the SHSC — a Client collection and an Unassisted Persons collection.</p> <ul style="list-style-type: none"> <li>The Client collection captures information on adults and children who receive a service from a SHS agency.</li> <li>The Unassisted Person collection is used to gain information about adults and children whose request for service is not able to be met by a SHS agency.</li> </ul>	1/07/2011		National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Data cubes</li> <li>Summary tables published in electronic form</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restrictions and limitations govern the availability or use of data in this holding.</li> </ul>	<p><i>Client collection</i> - The base unit is a person who presents to an SHS agency requesting services. A person becomes a 'client' once they receive a service(s). A 'support period' is the period of time a client receives assistance from a SHS agency. It relates to the provision of a service and/or supported accommodation. During a support period, a range of services additional to supported accommodation can be provided. Detail on types of services provided is also available.</p> <p><i>Unassisted persons collection</i> - Comprises information on the number of instances where a person received no immediate services from a SHS agency.</p> <p>Details of all agencies participating in the SHSC are on the Specialist Homelessness Establishment Database file. The Specialist Homelessness Information Platform (SHIP) supports agencies to report for the SHSC and allows them to record information about support provided to clients and instances where a person received no immediate services. Information is extracted from SHIP and submitted to the AIHW monthly.</p>	Admin data	<a href="#">SHS NMDS 2017</a>  <a href="#">SHSC 2016–17 DQS</a>	<a href="#">Specialist Homelessness Services reports</a>  <a href="#">Report on Government Services Australia's welfare</a>	<a href="mailto:homelessnessdata@aihw.gov.au">homelessnessdata@aihw.gov.au</a>
<b>Supported Accommodation Assistance Program National Data Collection (SAAP NDC)</b>	<p>The Specialist Homelessness Services Collection (SHSC) replaced the SAAP NDC on 1 July 2011. For key differences between the SAAP NDC and SHSC, see Appendix D of <i>Specialist Homelessness Services 2011–12</i> (AIHW website).</p> <p>The SAAP NDC provided nationally consistent information on SAAP clients and services from July 1996 to June 2011. It was jointly funded by Commonwealth, state and territory governments and comprised three collections:</p> <ul style="list-style-type: none"> <li>Client collection – the main component, captured socio-demographic information about clients receiving support under SAAP, services required by and provided to each client, and client circumstances before and after receiving support.</li> <li>Demand for accommodation collection – which operated over a 1-week period, twice yearly. It captured information about the number of people who requested accommodation at SAAP agencies, which requests were met, and reasons for this.</li> <li>Administrative collection – collated from information obtained by state and territory government departments in the course of administering the SAAP program. It captured descriptive information about SAAP agencies.</li> </ul> <p>The following special issues collections were also undertaken as part of the SAAP NDC:</p> <ul style="list-style-type: none"> <li>Casual client collection – discontinued from the SAAP NDC in June 2005 when the definitions of client and support period were changed so that many people previously counted as casual clients would be counted in the Client collection from 1 July 2005.</li> </ul>	1/07/1996	30/06/2011	National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Statistics</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)</li> <li>Restrictions and limitations govern the availability or use of data in this holding.</li> </ul>	<p>The scope of SAAP NDC data varied by collection component and over time. For more information, refer to the annual reports for the data collection, available from the AIHW website.</p>	Admin data	<a href="#">Client collection NMDS</a>  <a href="#">Demand for accommodation collection NMDS</a>  <a href="#">Administrative collection NMDS</a>	<a href="#">Homelessness reports</a>	<a href="mailto:homelessnessdata@aihw.gov.au">homelessnessdata@aihw.gov.au</a>

	<ul style="list-style-type: none"> <li>Accompanying child in SAAP collection – collected information about the children who accompanied an adult and received assistance under SAAP between 21 May and 30 June 1998.</li> <li>Income issues collection – collected information on SAAP clients with no/very low income. It was conducted from May to June 2000.</li> </ul> <p>A number of methodological changes to the SAAP NDC occurred over time. Refinements to data items introduced in July each year are summarised in the annual reports for the data collection, available from the AIHW website. In particular, in 2005–06 a Core Data Set was introduced (collecting fewer data items, introducing a new statistical linkage key and incorporating changes to some definitions) and from 2000–01, the Client Collection captured demographic and support information for each child requiring assistance.</p>
