<b>Adult Vaccination Survey Data Collection</b>	The Adult Vaccination Survey gathered information about vaccination of adults for the following conditions: influenza, pneumonia, tetanus, shingles. In 2009 the survey also gathered information about vaccination for pertussis ('whooping cough') and the pandemic (H1N1) virus, also known as 'swine flu'. This survey was run seven times between 2000 and 2010. The AIHW holds the data for 2002, 2004, 2006 and 2009/10.	1/01/2002	31/12/2010	National	<ul style="list-style-type: none"> <li>• Publications</li> <li>• Restrictions and limitations governing the availability or use of other data in this holding.</li> </ul>	The survey scope is a nationally representative sample of adults. Age ranges vary by survey. <b>Alcohol and Other Drug Treatment Services (National Minimum Data Set)</b>	The Alcohol and Other Drug Treatment Services National Minimum Data Set (AODTS NMDS) emanated from the national forum 'treatment and research - where to from here?' held in 1995 by the Alcohol and Other Drugs Council of Australia. In December 1999 the Commonwealth and state and territory governments through the then National Health Information Management Group endorsed a version of the AODTS NMDS for collection to commence on 1 July 2000. The first data were collected for 2000-01; this was considered a pilot year. The data from 2001-02 onwards contain information about alcohol and other drug treatment services; the clients who use these services; the types of drug problems for which treatment is sought and the types of treatment provided.	1/07/2000	30/06/2019	National National and State Other	<ul style="list-style-type: none"> <li>• Publications</li> <li>• Data cubes</li> <li>• Summary tables published in electronic form</li> <li>• Statistics</li> <li>• Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>• Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)</li> </ul>	Government publicly-funded alcohol and other drug treatment specialist services, national. <b>Australasian Paediatric Endocrine Group dataset (APEG)</b>	The APEG dataset contains information on young people with insulin-treated diabetes aged 0-14 years at the time of diagnosis. As insulin-treated type 2 diabetes is rare in children under 15 years old, most of the children and adolescents listed on the APEG dataset have type 1 diabetes. APEG data are primarily used by the AIHW (together with National Diabetes Services Scheme (NDSS) Registrant data; NDSS Sales data and National Death Index (NDI) data) to create the National (insulin-treated) Diabetes Register (NDR).	1/01/1999	31/03/2020	National and State	<ul style="list-style-type: none"> <li>• Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>• Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	Incident cases of insulin-treated diabetes in young people aged 0-14 years at the time of diagnosis, 1999-2016, Australia. Due to concerns about the coverage of data in 1999, most reporting begins in 2000.	Official	N/A	<a href="#">NDR DQS</a>	diabetes@aihw.gov.au	Restricted access
<b>Australian and New Zealand Dialysis and Transplant Registry (ANZDATA)</b>	The ANZDATA collects information to monitor dialysis and transplant treatments from all renal units in Australia and New Zealand on all patients receiving kidney replacement therapy where the intention to treat is long-term. Cases of acute kidney injury are excluded. The registry is coordinated within the Queen Elizabeth Hospital in Adelaide and compiles data on incidence and prevalence of treated-ESKD, complications, comorbidities and patient deaths. All relevant hospitals and related dialysis units participate.	1/01/1980	31/12/2018	National and State	<ul style="list-style-type: none"> <li>• Publications</li> <li>• Client specified tables on request which may be subject to data provider approval (charges apply);</li> <li>• Unit records are not available</li> </ul>	People registered on Australia and New Zealand Dialysis and Transplant Register. Collects demographic and status of treatment. <b>Australian Burden of Disease Database</b>	The Australian Burden of Disease Database contains aggregated output of burden of disease metrics from the Australian Burden of Disease Study. This includes Years of life lost (YLL), Years lived with disability (YLD) and Disability-adjusted life years (DALY) for around 200 diseases and injuries. It also includes estimates of attributable burden (DALY) for around 30 risk factors.	1/01/2003	31/12/2015	National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Unit records are not available</li> </ul>	<p>The Australian Burden of Disease Database was established as part of the Australian Burden of Disease Study 2011 to set up the relevant infrastructure to enable efficient and timely ongoing updates by the AIHW as required.</p> <p>The database is updated and added to following the completion of each ABDS. It currently includes national estimates of disease burden and risk factor attribution for 2003, 2011 and 2015. Subnational estimates of disease burden are available for state/territory, remoteness and socioeconomic group for 2011 and 2015. Subnational estimates of risk factor attribution are available for socioeconomic group for 2015.</p> <p>Indigenous-specific estimates of disease burden and risk factor attribution are available for 2003 and 2011.</p> <p>All data are available by 5 year age group and sex.</p>	Admin data; Survey	N/A	For more information on burden of disease data and related publications by AIHW see: <a href="http://www.aihw.gov.au/burden-of-disease/">http://www.aihw.gov.au/burden-of-disease/</a>	burdenofdisease@aihw.gov.au	
<b>Australian Cancer Database</b>	<p>The Australian Cancer Database (ACD) contains data about all new cases of cancer diagnosed in Australia since 1 January 1982, excluding basal and squamous cell carcinomas of the skin.</p> <p>Cancer is a notifiable disease in all Australian states and territories. The relevant legislation requires certain individuals and organisations to notify all new cases of cancer to the jurisdiction's central cancer registry. These registries supply data annually to the AIHW, which cleans and standardises the data, notifies the registries of inter-state duplicates and produces the Australian Cancer Database.</p>	1/01/1982		National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Statistics</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)</li> </ul> <p>Restrictions and limitations govern the availability or use of other data in this holding.</p>		Official	<a href="#">Latest Data Quality Statement</a>	<a href="#">Australian Cancer Database</a>	cancer@aihw.gov.au	
<b>Australian Diabetes Obesity And Lifestyle Study</b>	The baseline AusDiab study was conducted in 1999-2000 (baseline) and 2005 (follow-up) to determine the prevalence of diabetes, obesity and other risk factors including hypertension and dyslipidaemia.	1/01/1999	31/12/2005	National	<ul style="list-style-type: none"> <li>Publications</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	Stratified sample of adults 25 and over residing in 42 randomly chosen Census Collector Districts across the six States and the Northern Territory. Survey	N/A	<a href="#">2010 ANIFS indicator results</a> Researchers can access a confidentialised unit record file through the <a href="#">Australian Data Archive</a> .	<a href="mailto:pophealth2@aihw.gov.au">pophealth2@aihw.gov.au</a>	
<b>Australian Mesothelioma Registry database</b>	<p>The Australian Mesothelioma Registry (AMR) has been operational since 2011. The AMR was managed by the Cancer Institute New South Wales (CINSW) until 31 August 2017. Since then, the AMR has been managed by the AIHW. The AMR is funded by Safe Work Australia (SWA).</p> <p>Since 2011, the AMR has collected information on new cases of mesothelioma diagnosed in Australia from 1 July 2010. The eight state and territory cancer registries provide incidence and mortality data on new cases of mesothelioma to the AMR. These records include demographic information and details of diagnosis and death.</p> <p>The AMR also collects asbestos exposure information, obtained from consenting mesothelioma patients through a postal questionnaire and telephone interview. The postal questionnaire collects information on a patient's residential history, occupational history and family history of mesothelioma. The telephone interviews collect additional information, based on responses to the postal questionnaire, to assess the likelihood of asbestos exposure.</p>	1/07/2010		National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	The notifications data include all cases of mesothelioma diagnosed in Australia since 1 July 2010. Asbestos exposure data includes all consenting patients diagnosed with mesothelioma in Australia since 1 July 2010, who are physically and mentally able to participate.	Official; Survey		Additional information is available on the <a href="#">AMR website</a> .	<a href="mailto:cancer@aihw.gov.au">cancer@aihw.gov.au</a>	
<b>Australian Spinal Cord Injury Register</b>	Data on first and subsequent admissions, from 1 July 1995, to any of the seven specialised spinal units in Australia are being registered prospectively. The register enables measurement of spinal cord injury incidence, study of circumstances and mechanisms.	1/07/1995		National	<ul style="list-style-type: none"> <li>Publications;</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply);</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	The Australian Spinal Cord Injury Register (ASCIR) is a national register of incident cases of spinal cord injury which occur in Australia and overseas to Australian residents if they are treated in a spinal unit in Australia. Currently, 7 spinal units, all based in public hospitals, contribute data. <b>Child Protection National Minimum Dataset (CP NMDS)</b>	<p>The Child Protection National Minimum Data Set (CP NMDS) is an annual collection of information on child protection in Australia. It contains data on children who come into contact with State and Territory departments responsible for child protection. The CP NMDS consists of the following data files: client demographics; notifications, investigations and substantiations; care and protection orders; living arrangements, including children in funded out-of-home care; carer households; data for reporting on National Out-of-Home Care Standards measures. Where possible, data are also collected on sibling relationships.</p> <p>The CP NMDS collection was implemented in 2012–13. Prior to that a national aggregate child protection data collection was used for national child protection reporting (data for this collection began in 1990–91).</p> <p>Some data are still collected in aggregate format in Excel spreadsheets.</p> <p>The data are published annually by AIHW and are also used for the Report on Government Services.</p>	30/06/2012		National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	Child protection notifications, investigations and substantiations; care and protection orders; living arrangements, including children in funded out-of-home care; carer households; national out-of-home care standards; sibling relationships. <b>Community Aged Care Packages (CACP) Census</b>	A census of Community Aged Care Package outlets and care recipients, covering one week of the year. Outlets were asked record assistance provided during 7 consecutive days within the period 16 September 2002 and 14 October 2002.	16/09/2002	14/10/2002	National	Publications	The census covers clients in whose name a subsidy is claimed AND supplementary clients (also known as excess clients) who are not generally recorded in the CACP administrative by-product data collection. Also contains information on service providers that participated in the census.	Official	Available on request	<a href="#">Community Aged Care Packages census 2002</a>	<a href="mailto:gen@aihw.gov.au">gen@aihw.gov.au</a>	Restricted access
<b>Community Care</b>	This is administrative by product data for the Community Aged Care Packages (CACP) Program, Extended Aged Care at Home (EACH) packages and EACH-DEMENTIA (EACHD), and the Transition Care Packages Program. These are all programs designed to enable frail older people with complex care needs to continue living in the community. This is the source of the data for the publication by the AIHW on Community Aged Care packages which has its origins in CACP reporting. Transition care is Commonwealth/State funded but other programs receive recurrent Commonwealth funding. Home and Community Care (HACC) is reported annually by DoHA and reports are available on their website. The Institute receives a copy of the annual HACC MDS.	30/06/1992	30/06/2009	National	Publications	All recipients of mainstream community aged care packages, EACH and EACHD programs and the Transition Care program.	Official	Available on request	See the aged care topic on the AIHW website	<a href="mailto:gen@aihw.gov.au">gen@aihw.gov.au</a>	Restricted access

<b>Community Housing (CH) data collection</b>	<p>The Community Housing (CH) data collection captures information about CH organisations, the dwellings they manage and the tenants assisted.</p> <p>CH is rental housing for low- to moderate-income or special-needs households. It is managed by community-based organisations that lease properties from government or have received a capital or a recurrent subsidy from government. CH models vary across states and territories, and the housing stock may be owned by a variety of groups including government.</p> <p>The data are supplied by state and territory housing departments on an annual basis.</p> <p>Since 1996–97, the AIHW has compiled CH data from state and territory housing departments on an annual basis. These data help to describe the performance of the current National Housing and Homelessness Agreement and the former National Affordable Housing Agreement and Commonwealth-State Housing Agreement.</p> <p>The data collection has evolved over time. Changes have occurred to data collection scope, procedures, data items and underlying definitions and concepts.</p>	1/07/1996	30/06/2020	National and State	<ul style="list-style-type: none"> <li>Publications</li> <li>Summary tables published in electronic form</li> <li>Statistics</li> <li>Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply)</li> </ul> <p>There are restrictions and limitations governing the availability or use of other data in this holding.</p>	<p>CH includes tenancy (rental) units under management of a CH organisation, excluding Indigenous CH organisations. CH excludes dwellings:</p> <ul style="list-style-type: none"> <li>where the tenancy is managed under: Public Housing; State and Territory Owned and Managed Indigenous Housing; Indigenous CH; or the Crisis Accommodation Program.</li> <li>no longer administered by a CH organisation at 30 June of the reference financial year (including dwellings demolished, sold or otherwise disposed of).</li> <li>not yet available to CH organisations at 30 June of the reference financial year (e.g. under construction or being purchased).</li> </ul> <p>Additional jurisdiction-specific inclusions and exclusions reflect: different definitions of CH in legislation; difficulties in identifying some organisations e.g. those not registered or funded by the state/ territory housing authority; inconsistencies in reporting e.g. inclusion of transitional housing and National Rental Affordability Scheme dwellings owned or managed by CH organisations.</p> <p>Currently:</p> <ul style="list-style-type: none"> <li>NSW, Vic, WA, SA, Tas and ACT supply unit record level data, including details on individuals, organisations, dwellings and associated tenancies of the organisations.</li> <li>Qld supplies aggregate data supplemented by unit record administrative data for funded organisations, properties and current waitlist applications.</li> <li>NT supplies finalised aggregate data, including dwelling and organisational level data, but not information on individual tenancies or persons.</li> <li>Data are incomplete for some jurisdictions due to non/under-reporting by CH organisations.</li> </ul>	Admin data	<p><a href="#">Community Housing Data Set Specification</a></p> <p><a href="#">Community Housing Data Collection Data Quality Statement</a></p>	<p><a href="#">Housing assistance in Australia Report on Government Services</a></p> <p><a href="#">Australia's Welfare</a></p>	housing@aihw.gov.au

<b>Disability Services National Minimum Data Set (DS NMDS)</b>	<p>Since 1991, data was collected and reported on disability support services in Australia have been provided under four national disability agreements.</p> <p>The Commonwealth/State Disability Agreement Minimum Data Set (CSDA MDS) collection was set up as a 'snapshot' data collection in 1994, following the signing of the first CSDA in 1991.</p> <p>The second CSDA, signed in 1998, reflected significant changes which meant the CSDA MDS collection needed to be redesigned, including changing the collection to be a full year data collection.</p> <p>In 2002-03, the redeveloped CSDA MDS became the Commonwealth State/Territory Disability Agreement National Minimum Data Set (CSTDA NMDS), and the first full financial year of data collection took place between 1 July 2003 and 30 June 2004.</p> <p>The National Disability Agreement (NDA) replaced the CSTDA on 1 January 2009. As a result of the implementation of the NDA, from 2009-10 the CSTDA NMDS was renamed the DS NMDS.</p> <p>From 1 July 2013, state and territory-based disability support services provided under the NDA were progressively transitioned over to the National Disability Insurance Scheme (NDIS). This has meant that 2018-19 was the last year for which DS NMDS was data collected and reported.</p>	1/07/1994	30/06/2019	National and State	<ul style="list-style-type: none"> <li>• Publications</li> <li>• Data cubes</li> <li>• Summary tables published in electronic form</li> <li>• Statistics</li> <li>• Client specified tables on request which may be subject to data provider approval (charges apply)</li> <li>• Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul>	Covers specialist disability support services provided under the National Disability Agreement. <b>Risk Factor Prevalence Survey Data Collection</b>	<p>There were three Risk Factor Prevalence Surveys (RFPS) run in 1980, 1983 and 1989. These surveys gathered information about the prevalence of heart disease risk factors in adult Australians living in State and Territory capital cities. The surveys gathered self-reported health and demographic information, measured height, weight and blood pressure and collected blood samples for analysis. In all three surveys the blood samples were tested for total cholesterol, HDL cholesterol and triglyceride levels. For the 1989 survey additional analysis of the blood samples was carried out to test blood iron, ferritin and transferrin levels.</p>	1/05/1980	1/06/1989	National	<p>Publications</p> <p>There are restrictions and limitations governing the availability or use of other data in this holding.</p>	<p>For the 1980 and 1983 survey participants were adults aged 25-64 years randomly selected from the electoral roll and recruited from defined catchment areas in the 6 State capitals. Canberra and Darwin were excluded.</p> <p>For the 1989 survey participants were adults aged 20-69 years recruited from defined catchment areas in the 6 State capitals, as well as Canberra and Darwin.</p>	Survey		<a href="#">Australian Data Archive data holding</a>	<a href="mailto:pophealth2@aihw.gov.au">pophealth2@aihw.gov.au</a>	Restricted access
<b>Specialist Homelessness Services Collection (SHSC)</b>	<p>The SHSC collects information about people who are referred to, or seek assistance from, specialist homelessness services (SHS) agencies. These services collect the data on an ongoing basis and are responsible for submitting the data to the AIHW on a monthly basis.</p> <p>There are two parts to the SHSC — a Client collection and an Unassisted Persons collection.</p> <ul style="list-style-type: none"> <li>• The Client collection captures information on adults and children who receive a service from an SHS agency.</li> <li>• The Unassisted Person collection is used to gain information about adults and children whose request for service is not able to be met by an SHS agency.</li> </ul>	1/07/2011		National and State	<ul style="list-style-type: none"> <li>• Publications;</li> <li>• Data cubes;</li> <li>• Summary tables published in electronic form;</li> <li>• Client specified tables on request which may be subject to data provider approval (charges apply).</li> </ul> <p>There are restrictions and limitations governing the availability or use of other data in this holding.</p>	<p>Client collection - The base unit is a person who presents to an SHS agency requesting services. A person becomes a 'client' once they receive a service(s). A 'support period' is the period of time a client receives assistance from a SHS agency. It relates to the provision of a service and/or supported accommodation. During a support period, a range of services additional to supported accommodation can be provided. Detail on types of services provided is also available.</p> <p>Unassisted persons collection - Comprises information on the number of instances where a person received no immediate services from a SHS agency.</p> <p>Details of all agencies participating in the SHSC are on the Specialist Homelessness Establishment Database file.</p> <p>Information is submitted to the AIHW monthly.</p>	Admin data	<p><a href="#">Specialist Homelessness Services Collection NMDS 2019</a></p> <p><a href="#">Specialist Homelessness Services Collection, 2019-20 DQS</a></p> <p><a href="#">Specialist Homelessness Services Collection training &amp; resources</a></p>	<p><a href="#">Specialist Homelessness Services reports</a></p> <p><a href="#">Report on Government Services</a></p> <p><a href="#">Australia's welfare</a></p>	<a href="mailto:homelessnessdata@aihw.gov.au">homelessnessdata@aihw.gov.au</a>

<b>Supported Accommodation Assistance Program Data Collection</b>	<p>The Specialist Homelessness Services Collection (SHSC) replaced the SAAP National Data Collection (NDC) on 1 July 2011. For key differences between the SAAP NDC and SHSC, see Appendix D of Specialist Homelessness Services 2011–12 (AIHW website).</p> <p>The SAAP NDC provided nationally consistent information on SAAP clients and services from July 1996 to June 2011. It was jointly funded by Commonwealth, state and territory governments and comprised three main collections:</p> <ul style="list-style-type: none"> <li>• Client collection – the main component, captured socio-demographic information about clients receiving support under SAAP, services required by and provided to each client, and client circumstances before and after receiving support.</li> <li>• Demand for accommodation collection – which operated over a 1-week period, twice yearly. It captured information about the number of people who requested accommodation at SAAP agencies, which requests were met, and reasons for this.</li> <li>• Administrative collection – collated from information obtained by state and territory government departments in the course of administering the SAAP program. It captured descriptive information about SAAP agencies. The following special issues collections were also undertaken as part of the SAAP NDC: <ul style="list-style-type: none"> <li>• Casual client collection – discontinued from the SAAP NDC in June 2005 when the definitions of client and support period were changed so that many people previously counted as casual clients would be counted in the Client collection from 1 July 2005.</li> <li>• Accompanying child in SAAP collection – collected information about the children who accompanied an adult and received assistance under SAAP between 21 May and 30 June 1998.</li> <li>• Income issues collection – collected information on SAAP clients with no/very low income. It was conducted from May to June 2000.</li> </ul> </li> </ul> <p>A number of methodological changes to the SAAP NDC occurred over time. Refinements to data items introduced in July each year are summarised in the annual reports for the data collection, available from the AIHW website. In particular, in 2005–06 a Core Data Set was introduced (collecting fewer data items, introducing a new statistical linkage key and incorporating changes to some definitions) and from 2000–01, the Client Collection captured demographic and support information for each child requiring assistance.</p> <p>The AIHW continues to hold data collected through the following surveys of SAAP agencies conducted by the AIHW outside of the SAAP NDC:</p> <ul style="list-style-type: none"> <li>• High and complex needs census (June 2008).</li> <li>• Youth homelessness pilot programme collection (1 July 1997 to 31 December 1999).</li> <li>• NSW access and exiting project collection (23 August to 1 September 2002).</li> </ul> <p>Access to SAAP data collected outside of the SAAP NDC is restricted.</p>	1/07/1996	30/06/2011	National and State	<ul style="list-style-type: none"> <li>• Publications;</li> <li>• Summary tables published in electronic form;</li> <li>• Statistics;</li> <li>• Client specified tables on request which may be subject to data provider approval (charges apply);</li> <li>• Restricted unit record access subject to Ethics Committee approval and/or the agreement of all relevant data custodians in all states and territories (charges may apply).</li> </ul> <p>There are restrictions and limitations governing the availability or use of other data in this holding.</p>	The scope of SAAP NDC data varied by collection component and over time. For more information, refer to the annual reports for the data collection, available from the AIHW website. <b>Younger people with disability in residential aged care (YPIRAC)</b>	The Younger people with disability in residential aged care (YPIRAC) program was agreed by the Council of Australian Governments (COAG) on 10 February 2006 with the aim of delivering sustained reductions in the number of younger people with disability in residential aged care. The YPIRAC program operated under a 5-year agreement between the Australian Government and state and territory governments. The program was funded through the states and territories and administered by the Australian Government Department of Families, Housing, Community Services and Indigenous Affairs (FaHCSIA). The AIHW was contracted by FaHCSIA to develop a YPIRAC Minimum Data Set (MDS), and to complete the MDS over the 5-year collection periods. YPIRAC data collected concluded in 2010-11.	1/07/2006	30/06/2011	National and State	<ul style="list-style-type: none"> <li>Publications;</li> <li>Summary tables published in electronic form.</li> </ul> <p>There are restrictions and limitations governing the availability or use of other data in this holding.</p>	All state and territory governments provide data on the YPIRAC program.
