

National minimum data sets

Admitted patient care NMDS 2010–2011

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	386797
<i>Registration status:</i>	Health, Standard 22/12/2009
<i>DSS type:</i>	National Minimum Data Set (NMDS)
<i>Scope:</i>	<p>The purpose of this National Minimum Data Set is to collect information about care provided to admitted patients in Australian hospitals.</p> <p>The scope is episodes of care for admitted patients in all public and private acute and psychiatric hospitals, free standing day hospital facilities and alcohol and drug treatment centres in Australia. Hospitals operated by the Australian Defence Force, corrections authorities and in Australia's off-shore territories may also be included. Hospitals specialising in dental, ophthalmic aids and other specialised acute medical or surgical care are included.</p> <p>Hospital boarders and still births are not included as they are not admitted to hospital. Posthumous organ procurement episodes are also not included.</p>

Collection and usage attributes

<i>Statistical unit:</i>	Episodes of care for admitted patients
<i>Collection methods:</i>	<p>Data are collected at each hospital from patient administrative and clinical record systems. Hospitals forward data to the relevant state or territory health authority on a regular basis (e.g. monthly).</p> <p><i>National reporting arrangements</i></p> <p>State and territory health authorities provide the data to the Australian Institute of Health and Welfare for national collation, on an annual basis.</p> <p><i>Periods for which data are collected and nationally collated</i></p> <p>Financial years ending 30 June each year.</p>
<i>Implementation start date:</i>	01/07/2010
<i>Comments:</i>	<p><i>Scope links with other NMDS</i></p> <p>Episodes of care for admitted patients which occur partly or fully in designated psychiatric units of public acute hospitals or in public psychiatric hospitals:</p> <ul style="list-style-type: none">• Admitted patient mental health care NMDS. <p>Episodes of care for admitted patients where care type is palliative care:</p> <ul style="list-style-type: none">• Admitted patient palliative care NMDS. <p><i>Glossary items</i></p> <p>Some previous Knowledgebase data element concepts are available in the METeOR glossary. Glossary items are available</p>

Admitted patient mental health care NMDS 2010–2011

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	386799
<i>Registration status:</i>	Health, Standard 05/01/2010
<i>DSS type:</i>	National Minimum Data Set (NMDS)
<i>Scope:</i>	The scope of this minimum data set is restricted to admitted patients receiving care in psychiatric hospitals or in designated psychiatric units in acute hospitals. The scope does not currently include patients who may be receiving treatment for psychiatric conditions in acute hospitals who are not in psychiatric units.

Collection and usage attributes

<i>Statistical unit:</i>	Episodes of care for admitted patients
<i>Collection methods:</i>	Data are collected at each hospital from patient administrative and clinical record systems. Hospitals forward data to the relevant state or territory health authority on a regular basis (for example, monthly). <i>National reporting arrangements</i> State and territory health authorities provide the data to the Australian Institute of Health and Welfare for national collation, on an annual basis. <i>Periods for which data are collected and nationally collated</i> Financial years ending 30 June each year.
<i>Implementation start date:</i>	01/07/2010
<i>Comments:</i>	Number of days of hospital in the home care data will be collected from all states and territories except Western Australia from 1 July 2001. Western Australia will begin to collect data from a later date. <i>Scope links with other NMDSs:</i> Episodes of care for admitted patients which occur partly or fully in designated psychiatric units of public acute hospitals or in public psychiatric hospitals: <ul style="list-style-type: none">• Admitted patient care NMDS• Admitted patient palliative care NMDS <i>Glossary items</i> Glossary terms that are relevant to this National Minimum Data Set are included here. Elective surgery waiting times (census data) NMDS 2009–

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	375331
<i>Registration status:</i>	Health, Standard 03/12/2008
<i>DSS type:</i>	National Minimum Data Set (NMDS)
<i>Scope:</i>	<p>The scope of this minimum data set is patients on waiting lists for elective surgery (as defined in the 'Elective care waiting list episode – elective care type, code N' data element (also referred to by the short name 'Waiting list category') which are managed by public acute hospitals. This will include private patients treated in public hospitals, and may include public patients treated in private hospitals.</p> <p>Hospitals may also collect information for other care (as defined in the Waiting list category data element), but this is not part of the National Minimum Data Set (NMDS) for Elective surgery waiting times.</p> <p>Patients on waiting lists managed by hospitals operated by the Australian Defence Force, corrections authorities and Australia's external territories are not currently included.</p> <p>Census data:</p> <p>Data are collected for patients on elective surgery waiting lists who are yet to be admitted to hospital or removed for another reason. The scope is patients on elective surgery waiting lists on a census date who are 'ready for care' as defined in the Elective surgery waiting list episode – patient listing status, readiness for care code N data element.</p>

Collection and usage attributes

<i>Statistical unit:</i>	Patients on waiting lists on census dates.
<i>Collection methods:</i>	<p>Elective care waiting list episode – category reassignment date, DDMMYYYY is not required for reporting to the NMDS, but is necessary for the derivation of Elective surgery waiting list episode – waiting time (at a census date), total days N[NNN].</p> <p>Elective care waiting list episode – elective care type, code N and Elective surgery waiting list episode – patient listing status, readiness for care code N are not required for reporting to the NMDS, but are necessary for determining whether patients are in scope for the NMDS. These data elements should be collected at the local level and reported to state and territory health authorities as required.</p> <p><i>National reporting arrangements</i></p> <p>State and territory health authorities provide the data to the Australian Institute of Health and Welfare for national collation, on an annual basis.</p> <p><i>Periods for which data are collected and nationally collated</i></p> <p>Census dates are 30 September, 31 December, 31 March and 30 June.</p>

Implementation start date: 30/06/2009

Comments: There are two different types of data collected for this national minimum data set (census data and removals data) and the scope and list of data elements associated with each is different.

For the purposes of this NMDS, public hospitals include hospitals which are set up to provide services for public patients (as public hospitals do), but which are managed privately.

The inclusion of public patients removed from elective surgery waiting lists managed by private hospitals will be investigated in the future.

Government health expenditure NMDS 2009–2010

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	376403
<i>Registration status:</i>	Health, Standard 01/04/2009
<i>DSS type:</i>	National Minimum Data Set (NMDS)
<i>Scope:</i>	<p>The scope of this dataset is direct government and government-funded expenditure on health and health-related goods and services.</p> <p>The purpose of this NMDS is to provide an enhanced understanding of the overall financial resources (recurrent and capital) used by the health system, and of unit costs and performance; to enable greater comparability of health expenditure data between jurisdictions and over time; and to provide a more efficient compilation of national reports and analyses on government funded health expenditure.</p>

Collection and usage attributes

<i>Statistical unit:</i>	Providers of health or health related goods and services or non-health services that support the health services industry; health or health related functions; and the sources of funds for these providers or functions.
<i>Guide for use:</i>	<p>The GHE NMDS consists of 5 mandatory data clusters and 1 conditional data cluster.</p> <p>The first two data elements named in each data cluster form one of the two axes of a matrix that combine to provide all data in Australian dollars.</p> <p>Data are to be reported in Australian dollars except when reporting the State/Territory identifier of the Jurisdiction.</p>
<i>Collection methods:</i>	<p>Data are collected by a number of providers from their administrative systems and forwarded to the relevant state or territory health authority on a regular basis (for example, monthly). Hospitals forward data obtained from patient administrative and clinical record systems to the relevant state or territory health authority on a regular basis (for example, monthly). Other data are obtained either directly from annual reports or through surveys.</p> <p>National reporting arrangements</p> <p>State and Territory health authorities provide the data to the Australian Institute of Health and Welfare for national collation, on an annual basis.</p> <p>Periods for which data are collected and nationally collated:</p> <p>Financial years ending 30 June each year.</p>

Mental health establishments NMDS 2010–2011

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	378611
<i>Registration status:</i>	Health, Standard 02/12/2009
<i>DSS type:</i>	National Minimum Data Set (NMDS)
<i>Scope:</i>	<p>The scope of the MHE National Minimum Data Set (NMDS) is all specialised mental health services managed by, or in receipt of funds, from state or territory health authorities.</p> <p>Specialised mental health services are those with a primary function to provide treatment, rehabilitation or community health support targeted towards people with a mental disorder or psychiatric disability. These activities are delivered from a service or facility that is readily identifiable as both specialised and serving a mental health care function.</p> <p>The concept of a specialised mental health service is not dependent on the inclusion of the service within the state or territory mental health budget.</p> <p>A service is not defined as a specialised mental health service solely because its clients include people affected by a mental illness or psychiatric disability. The definition excludes specialist drug and alcohol services for people with intellectual disabilities, except where they are established to assist people affected by a mental disorder who also have drug and alcohol related disorders or intellectual disability.</p> <p>These services can be a sub-unit of a hospital even where the hospital is not a specialised mental health establishment itself (e.g. designated psychiatric units and wards, outpatient clinics etc).</p> <p>The statistical units are specialised mental health services. These are the specialised mental health components of the state and territory health authorities, and of regions within states and territories; specialised mental health service organisations; service units within those organisations; and private hospital and non-government residential service units funded by specialised mental health services.</p> <p>Non-government residential mental health services and specialised mental health services provided by private hospitals that receive state or territory government funding are included as service units for this NMDS.</p> <p>There is a hierarchy of statistical units used within the MHE NMDS. Information is provided at each level: State/Territory; Region; Organisation; Hospital/Service unit cluster; and Service unit (Admitted patient services, Residential services and Ambulatory services). Each level has a unique set of attributes which comprise the NMDS data elements and additional supplementary information.</p>

Collection and usage attributes

<i>Statistical unit:</i>	Specialised mental health services.

Non-admitted patient emergency department care NMDS 2010–2011

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	374220
<i>Registration status:</i>	Health, Standard 22/12/2009
<i>DSS type:</i>	National Minimum Data Set (NMDS)
<i>Scope:</i>	<p>This metadata set is nationally mandated for collection and reporting.</p> <p>The scope of this National Minimum Data Set (NMDS) is non-admitted patients registered for care in emergency departments in selected public hospitals that are classified as either Peer Group A or B in the Australian Institute of Health and Welfare's Australian Hospital Statistics publication from the preceding financial year.</p> <p>The care provided to patients in emergency departments is, in most instances, recognised as being provided to 'non-admitted' patients. Patients being treated in emergency departments may subsequently become 'admitted'. The care provided to non-admitted patients who are treated in the emergency department prior to being admitted is included in this NMDS.</p> <p>Care provided to patients who are being treated in an emergency department site as an admitted patient (e.g. in an observation unit, short-stay unit, 'emergency department ward' or awaiting a bed in an admitted patient ward of the hospital) are excluded from the emergency department care NMDS since the recording of the care provided to these patients is part of the scope of the Admitted patient care NMDS.</p>

Collection and usage attributes

<i>Statistical unit:</i>	Non-admitted patient emergency department service episodes.
<i>Collection methods:</i>	<p>National reporting arrangements</p> <p>State and territory health authorities provide the NMDS data to the Australian Institute of Health and Welfare for national collation, on an annual basis within 3 months of the end of a reporting period.</p> <p>The Institute and the Commonwealth Department of Health and Ageing will agree on a data quality and timeliness protocol. Once cleaned, a copy of the data and a record of the changes made will be forwarded by the Institute to the Commonwealth Department of Health and Ageing. A copy of the cleaned data for each jurisdiction should also be returned to that jurisdiction on request.</p> <p>Periods for which data are collected and nationally collated</p> <p>Financial years, ending 30 June each year. Extraction of data for a financial year should be based on the date of the end of the non-admitted emergency department service episode.</p>
<i>Implementation start date:</i>	01/07/2010

Comments:

Scope links with other metadata sets

Episodes of care for admitted patients are reported through the Admitted patient care NMDS.

Outpatient care NMDS

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	336862
<i>Registration status:</i>	Health, Standard 04/07/2007
<i>DSS type:</i>	National Minimum Data Set (NMDS)
<i>Scope:</i>	The scope of this National Minimum Data Set (NMDS) is for services provided to non-admitted, non-emergency department, patients registered for care by specialist outpatient clinics of public hospitals that are classified as either principal referral and specialist women's and children's hospitals and large hospitals (Peer Group A or B) as reported in the Australian Institute of Health and Welfare's Australian Hospital Statistics publication from the preceding financial year.

Hospitals use the term 'clinic' to describe various arrangements under which they deliver specialist outpatient services to non-admitted non-emergency department patients. **Outpatient clinic services** should be interpreted as encompassing services provided through specific organisational units staffed to administer and provide a certain range of outpatient care:

- in defined locations;
- at regular or irregular times; and
- where one or more specialist providers deliver care to booked patients.

Generally, in such clinics, a booking system is administered and patient records are maintained to document patient attendances and care provided.

The scope includes all arrangements made to deliver specialist care to non-admitted, non-emergency department patients whose treatment has been funded through the hospital, regardless of the source from which the hospital derives these funds. In particular, Department of Veterans' Affairs, compensable and other patients **funded through the hospital** (including Medicare ineligible patients) are included.

For the purposes of the Outpatient care NMDS, outreach services are counted at the specialist clinic where the patient is booked. Outreach services involve travel by the service provider, or services provided by a service provider via ICT (including but not limited to telephone and telehealth consultations). Such services may also be provided in the home, place of work or other non-hospital site.

Within the scope as defined, and subject to specific counting rules, occasions of service to be counted include outreach clinic services, services delivered in a multidisciplinary mode. A separate count of services delivered in group sessions is also collected.

Excluded from scope are:

- Outreach services which are not funded through the hospital and/or which deliver non-clinical care (activities such as home cleaning, meals on wheels, home maintenance); and

- All private specialist services delivered under private practice arrangements which are not funded through the hospital, regardless of whether or how these services may be funded by third party arrangements.
- All services covered by NMDS for:
 - Admitted Patient Care,
 - Admitted patient mental health care,
 - Alcohol and other drug treatment services,
 - Community mental health care,
 - Non-admitted patient emergency department.

Admitted patient services are excluded from scope. However, outpatient services booked for reasons independent of, or distinct from the admitted patient episode are in scope.

Collection and usage attributes

Statistical unit: Occasions of service.

Group sessions.

Collection methods:

National reporting arrangements:

State and territory Health authorities provide the data to the Department of Health and Ageing and Australian Institute of Health and Welfare on an annual basis by 31 December each calendar year, for the previous financial year.

Periods for which data are collected and nationally collated:

Each financial year ending 30 June.

Implementation start date: 01/07/2007

Residential mental health care NMDS 2010–2011

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	386809
<i>Registration status:</i>	Health, Standard 05/01/2010
<i>DSS type:</i>	National Minimum Data Set (NMDS)
<i>Scope:</i>	Episodes of residential care for residents in all government-funded residential mental health care services in Australia, except those residential care services that are in receipt of funding under the Aged Care Act and subject to Commonwealth reporting requirements (i.e. report to the System for the payment of Aged Residential Care (SPARC) collection).

Collection and usage attributes

<i>Statistical unit:</i>	Episodes of residential care. Statistical units are entities from or about which statistics are collected, or in respect of which statistics are compiled, tabulated or published.
<i>Collection methods:</i>	Data are collected at each service from resident administrative and care related record systems. Services forward data to the relevant state or territory health authority on a regular basis (e.g. monthly). National reporting arrangements State and territory health authorities provide the data to the Australian Institute of Health and Welfare for national collection, on an annual basis. Government-operated services that employ mental health trained staff on-site 24 hours per day are to be included from 1 July 2004. Government-funded, non-government operated services and non 24-hour staffed services can be included from 1 July 2004, optionally. For non 24-hour staffed services to be included they must employ mental health-trained staff on-site at least 50 hours per week with at least 6 hours staffing on any single day. Periods for which data are collected and nationally collated Financial years ending 30 June each year. The reference period starts on 1 July and ends on 30 June each year.
<i>Implementation start date:</i>	01/07/2010
<i>Comments:</i>	Some admitted patient care services may meet the definition of a residential mental health service. However, as they are admitted patient care services, relevant data on their patients are reported to the National Minimum Data Set for Admitted Patient Care.
