What is the National Drug Strategy Household Survey?
- The survey is conducted about every three years and started in 1985.
- It is managed by the Australian Institute of Health and Welfare (AIHW) on behalf of the Australian Government Department of Health and Ageing.

How confidential is the information I give you?
- All answers you provide will be treated confidentially.
- The research is carried out in compliance with the Privacy Act 1988 and the information is only used for research purposes.
- The survey is conducted under the AIHW Act, which prohibits the release of information about individuals collected in the survey.

How will my answers be used?
- Your answers will be used by researchers to help in understanding what people think about tobacco, alcohol and other drugs and how widely these drugs are used.
- The answers you give will not be released to anyone (including the police).

Do I have to participate in the survey?
- Participation in this survey is entirely voluntary.
- If there are any questions you do not want to answer for any reason, please leave that question blank.
- It is important that you complete this questionnaire by yourself and be as honest and accurate as possible.

Are you 12 – 17 years old?
- It is important that our younger respondents know that your answers will not be shown to anyone, this includes your parents.
- Please don’t be afraid or embarrassed to give honest answers.
- Your answers will simply become part of a bigger pool of answers and no one will know who you are.

What do I do when I’ve completed the survey?
- Once you have completed the survey, seal it in the envelope provided and a Roy Morgan Research fieldworker will return to collect it.
- The fieldworker will then return the sealed envelope to the survey team for processing.
- Only the survey team will have access to your form and once the survey data is compiled your form will be destroyed.
- Your name and address will never be linked with any of the information you provide.

How is the information processed?
- All survey forms are coded so the researchers will not know who you are. Your answers will be grouped with the answers of over 23,000 other people before the researchers get to see them.
- Researchers will use all these answers to show things like ‘most young people do not smoke’ or ‘three quarters of women drink alcohol’.
- When released in late-2014, the results of the survey will be available on the Institute’s website (www.aihw.gov.au).
How to complete this form:

- Please complete this form carefully using black ballpoint pen (not felt).
  
  Most questions only require you to answer by marking the appropriate box or boxes with a cross like this:

  **Right**
  
  [ ] [ ] [ ] [ ] [ ]

  Please do not mark any areas outside the box.

- Other questions will require a numeric answer and can be filled in like this:

  2 4 or 6

  Please do not cross the number 7. Please make sure to write only one number in each box. Always round up to whole numbers, unless otherwise indicated.

- Other questions will ask you to write your answer in the box provided. Please ensure that you print your answers like this:

  **Last year I travelled to Bali on a Holiday**

- If you need to change an answer, completely fill in the wrong box and put a cross in the box you want to answer, like this:

  Wrong box [ ]
  
  Right box [ ]

- If you see an instruction like this (Skip to), you should follow the direction exactly. For example (Skip to Y1) means that you should miss all the questions after the one you have just answered, until you come to the question marked Y1. If you do not see the (Skip to), just answer the next question.

- Please answer each section and then follow the Skips as required.

Reminder: Your answers are completely confidential. Please answer honestly. This survey is conducted under the AIHW Act which prohibits the release of any information about individuals collected in the survey.
The terms illicit drug and illegal drug are used interchangeably to describe each of the following:

- Any drug which is illegal to possess or use;
- Any legal drug used in an illegal manner, for example:
  - A drug obtained on prescription but given or sold to another person to use;
  - Glue or petrol which is sold legally, but is used in a manner that is not intended, such as inhaling fumes; or
  - Stolen pharmaceuticals sold on the black market (e.g. Pethidine).

For this survey, the term “non-medical purposes” means drugs used:

1. by itself to induce a drug experience or feeling;
2. with other drugs in order to enhance a drug experience;
3. for performance enhancement (e.g. athletic); or
4. for cosmetic purposes (e.g. body shaping).
