(a) 'Per 10,000 population' shows how many people out of every 10,000 in the population of that sex and age group became SAAP clients. The rate is estimated by comparing the number of SAAP clients with the estimated resident population in the designated sex and age group as at 30 June 2005 (preliminary estimates). For the age group under 15 years, only those aged 10–14 are included in the calculations.
